# MEASURING DARWIN 2030

## WHAT IS DARWIN 2030?

The City of Darwin Strategic Plan: *Darwin 2030 – City for People. City of Colour* came in to force on July 1 2019. The plan sets out the City of Darwin's vision for the next 10 years, drawing on community wisdom, existing Council strategies and plans, commitments to and with key stakeholders, and clearly states the aspirations to be achieved by 2030.

The Strategic Plan's *Appendix A -Strategic Projects and Performance, Measuring Success* sets out a proposed framework for prioritising projects that best align with the vision for the city and as a system for measuring performance.

The City of Darwin engaged Place Score to develop this new decision-making and performance tracking framework. The objectives were to develop metrics for measuring the performance of the Strategic Directions and to set Community Place Priorities.

Together these have been used to develop a Project Prioritisation Tool and Reporting methodology for both baseline performance measurement and long-term progress tracking.

## THE MISSION

The mission the City of Darwin has set for itself is:

*"We will work with the community and partners, provide leadership, and deliver services that create opportunities to enhance the economic, cultural and environmental sustainability of Darwin."*

The City's Strategic Plan identifies five community values:

- **Diversity and Acceptance:** Embrace our identity through building on our multicultural and local heritage, creating a sense of belonging
- **Choice of Lifestyle:** Maintain our unique laid-back lifestyle, through a connected, active and safe community
- **Environment:** Integrated long-term planning, including sustainable and renewable energy resources, recycling and economically sound initiatives
- **Sense of community:** Recognise, enhance and celebrate our identity through active participation within the community
- **Equality:** Leadership that adopts and maintains collaborative and transparent decision making, involving listening and responding to the community as a whole

## THE STRATEGIC DIRECTIONS

To achieve the vision, City of Darwin has set five strategic directions:

### A CAPITAL CITY WITH BEST PRACTICE AND SUSTAINABLE INFRASTRUCTURE

Council will actively pursue opportunities to fund strategic projects through Public Private Partnerships, Joint Ventures, government grant programs and other suitable funding mechanisms.

### A SAFE, LIVEABLE AND HEALTHY CITY

The community needs to be able to access all spaces. Our parks and open spaces will be well-maintained, clean and accessible for all. Council will continue to influence planning decisions and work to increase that level of influence.

### A COOL, CLEAN AND GREEN CITY

By recognising our footprint on the earth, and utilising renewable energy, supplemented by reduced demand on energy, we will contribute to giving future generations a healthy environment. We will invest in energy efficiencies and renewable energy to reduce our ecological footprint, ensuring we contribute to a healthy environment for generations to come. Darwin will be recognised globally for innovative and smart design in clean energy and waste management.

### A SMART AND PROSPEROUS CITY

We will continue to work with the Northern Territory Government, business and industry and other partners to advance the local economy.

### A VIBRANT AND CREATIVE CITY

By embracing, celebrating and valuing the richness different groups bring to the city, Darwin will be a more attractive place for both residents and visitors. It will build a greater sense of community ownership, connectedness and belonging.

## BASELINE REPORT

This Baseline Report has four main objectives:

### IDENTIFYING HOW THE CITY OF DARWIN IS CURRENTLY PERFORMING

Using Place Score's Place attributes, this Baseline Report identifies how each Strategic Direction is currently contributing to place experience.

### IDENTIFYING INVESTMENT PRIORITIES

Using people's values and what they currently perceive as contributing negatively to their place experience, this report will identify Community Place Priorities for each Strategic Direction.

### INFORM THE PROJECT PRIORITISATION TOOL

The Community Place Priorities will then inform the matrix and process used to assess, scope and prioritise proposed projects for the City of Darwin.

### TRACK THE IMPACT OF INVESTMENT

The 2019 performance illustrated in this report will act as a baseline against which future results can be compared. This will allow the City of Darwin to measure how much of an impact its projects and investment have had on people's experience of place, and how close the city is to achieving its 2030 vision.

## DATA SOURCES

There are three main sources of data used in this report:

### CARE FACTOR SURVEY

Care Factor™ is a proprietary, values-capture tool that identifies the place attributes that are valued by the most number of respondents.

Data was collected face to face and online.

### PLACE EXPERIENCE (PX) ASSESSMENTS

A PX Assessment asks users of an area to assess each place attribute in terms of its impact on their personal enjoyment of the space.

Data was collected face to face.

### ABOUT THE OPEN-ENDED QUESTION

The open-ended question asks respondents to share their idea for change. The 25 word answers are then categorised by Place Score in different themes to identify what the community says it wants.

Open-ended questions are only collected online.

## PLACE ATTRIBUTES ALIGNMENT

Place Score captures community values and performance across 50 Place Attributes, 10 in each of five Place Dimensions, or categories.

The following table defines the rationale for the alignment of Place Score place attributes with each of the City of Darwin's Strategic Directions. Attributes have been selected to best reflect the definition of each Strategic Direction.

STRATEGIC DIRECTION	ALIGNMENT BRIEF	PLACE SCORE ATTRIBUTES (50/50)
<b>A Capital City With Best Practice and Sustainable Infrastructure</b>	Attributes related to hard infrastructure	7 attributes
<b>A Safe, Liveable and Healthy City</b>	Attributes associated with safety, community resilience, activation, and healthy lifestyle	15 attributes
<b>A Cool, Clean and Green City</b>	Attributes associated with comfort and vegetation	5 Attributes
<b>A Smart and Prosperous City<sup>1</sup></b>	Attributes related to the local economy	10 attributes
<b>A Vibrant and Creative City</b>	Attributes associated to uniqueness, things to do, diversity and local history	13 attributes

Notes: <sup>1</sup>There are no Place Score Place attributes related to Smart Cities.

# ABOUT THE RESPONDENTS

Data was collected via online and face-to-face surveys during the period of 23 of July and 15 of September 2019. A total of 1574 people participated.

## CONFIDENCE LEVEL:

Unless noted otherwise, a **95% confidence level** can be expected for all results, with a margin of error of  $\pm 10\%$  for Care Factor data, and a standard error of  $\pm 5.8\text{pts}$  for PX data<sup>3</sup>.

	Demographic	Low Target	Achieved	Remark
CF	LGA	n = 380 for $\pm 5\%$ at 95% Confidence	n = 1125	Above target
	15-24 yrs	14.7% $\pm 5\%$	8.3%	1.4% below target margin
	25-44 yrs	44.5% $\pm 5\%$	48.1%	Target Achieved
	45-64 yrs	29.8% $\pm 5\%$	33.1%	Target Achieved
	65+ yrs	11% $\pm 5\%$	10.5%	Target Achieved
	Male	51.3% $\pm 5\%$	38.1%	8.1% below target margin
	Female	48.7% $\pm 5\%$	61.8%	8.1% above target margin
PX	Smallest Town Centre sample (Fannie Bay)	n=90 for $\pm 10\%$ at 95% Confidence	n = 89	1 respondent under target (achieved $\pm 10\%$ at 95% Confidence)
	15-24 yrs	14.7% $\pm 5\%$	10.5%	Target Achieved
	25-44 yrs	44.5% $\pm 5\%$	42.5%	Target Achieved
	45-64 yrs	29.8% $\pm 5\%$	30.5%	Target Achieved
	65+ yrs	11% $\pm 5\%$	16.5%	0.5% above target margin
	Male	51.3% $\pm 5\%$	51.7%	Target Achieved
	Female	48.7% $\pm 5\%$	47.7%	Target Achieved
	Smallest PX1 sample (Fannie Bay Supermarket)	n=25	n=13	12 respondents under target <sup>3</sup>
	Smallest PX2 sample (Parap Road)	n=40	n=43	Above target

## CARE FACTOR DATA

Data was collected via online and face-to-face surveys during the period of 24 of July and 15 of September 2019. A total of 1125 people participated.

## CARE FACTOR

*Which place attributes are most important to you in your ideal town centre?*

A Care Factor survey requires respondents to prioritise the place attributes that are the most important to them. In turn, this reveals which out of the 50 Place Attributes are the most valued by the community.

Data was collected for nine Town Centres. Data has been coded using the answers of people residing in the suburb of the town centre, respondents associated with the town centre (workers, visitors, students), as well as people residing in the immediate catchment of the Town Centre. The following map is an example of the Casuarina catchment area:

## PX ASSESSMENTS

*How is each place attribute impacting your personal enjoyment of this place?*

12 main street environments have been assessed by the Darwin community. Respondents were asked to rate how their main street performs against 50 different place attributes.

A Street PX Assessment is an observation study, which means most locations are between 200 and 400 meters in length to allow respondents to see the whole street when rating it. The following map is an example of what most location's limits and scale resemble:

## MAP OF CARE FACTOR DATA AND PX ASSESSMENT LOCATIONS

# EXECUTIVE SUMMARY

THIS SECTION PROVIDES AN EXECUTIVE SUMMARY OF  
KEY FINDINGS FOR DARWIN

# EXECUTIVE SUMMARY - 2019 PLACE CENSUS RESULTS

## ABOUT THIS REPORT

This research project has four main objectives:

### IDENTIFYING HOW THE CITY OF DARWIN IS CURRENTLY PERFORMING

Using Place Score's Place attributes, this Baseline Report identifies how each Strategic Direction is currently contributing to place experience.

### IDENTIFYING INVESTMENT PRIORITIES

Using people's values and what they currently perceive as contributing negatively to their place experience, this report will identify Community Place Priorities for each Strategic Direction.

### INFORM THE PROJECT PRIORITISATION TOOL

The Community Place Priorities will then inform the matrix and process used to assess, scope and prioritise proposed projects for the City of Darwin.

### TRACK THE IMPACT OF INVESTMENT

The 2019 performance illustrated in this report will act as a baseline against which future results can be compared. This will allow the City of Darwin to measure how much of an impact its projects and investment have had on people's experience of place, and how close the city is to achieving its 2030 vision.

## PROCESS

Between the 23 July and 15 September 2019, Care Factor data was collected for nine town centres and Place Experience (PX) Assessments were undertaken for 12 main streets environments.

**1125 PEOPLE SHARED WHAT IS THE MOST IMPORTANT TO THEM IN THEIR IDEAL TOWN CENTRE**

**449 PEOPLE RATED A MAIN STREET ENVIRONMENT**

**323 CARE FACTOR RESPONDENTS ALSO SHARED THEIR IDEA FOR CHANGE**

**A TOTAL OF 1897 INSIGHTS WERE SHARED BY THE DARWIN COMMUNITY**

## 2019 VALUES

Based on the Care Factor survey results, three main themes were identified as being an essential part of the Darwin community's ideal town centre:

### AN ABUNDANCE OF UNIQUE GREEN SPACES AND NATURAL FEATURES

Three of the Darwin LGA's top 5 Care Factors are related to nature and greenery. Your community highly values elements of the natural environment and how humans look after them.

### ATTRACTIVE AND WELL MAINTAINED PUBLIC SPACES

Cleanliness is Darwin's #1 Care Factor. The Darwin community also identified the maintenance of public spaces and street furniture as being important to them.

### SOCIAL AND SAFE SHARED ENVIRONMENTS

The Darwin community values spaces where everyone can feel safe and welcomed. Public events and outdoor trading play a strong role in the community's ideal town centre.

## 2019 PERFORMANCE

Based on the 12 main streets assessed by the Darwin community, overall trends have been identified for the Darwin LGA:

**DARWIN'S AVERAGE PX SCORE IS HIGHER THAN THE NATIONAL AVERAGE**

### THE BEST PERFORMING PLACE ATTRIBUTES INCLUDE:

- #1 Overall look and visual character of the area
- #2 Welcoming to all people
- #3 Point of difference from other similar streets or places

### THE WORST PERFORMING PLACE ATTRIBUTES INCLUDE:

- #50 Local history, heritage buildings or features
- #49 Unusual or unique buildings or public space design
- #48 Maintenance of public spaces and street furniture

## 2019 PLACE PRIORITIES

These tables and graph illustrate your the Darwin LGA's average strengths, priorities and considerations.

**STRENGTHS** should be celebrated and protected.

**PRIORITIES** identify the aspects of your town centres that are important to people but are currently under-performing. Improving these attributes will have the most significant impact on your community.

**CONSIDERATIONS** identify attributes to look-out for, they are negatively affecting your town centre and can become more significant issues if more people start caring about them.

*It should be noted that these priorities are based only on surveyed streets, and that the average includes the results of five City Centre locations. Town Centre specific priorities can be found in the next sections of this report.*

CF	STRENGTH
10 <sup>a</sup>	Overall look and visual character of the area
9	Welcoming to all people
10 <sup>b</sup>	Walking, cycling or public transport options
6	Evidence of public events happening here (markets, street entertainers etc.)
3 <sup>a</sup>	Sense of safety (for all ages, genders, day/night etc.)

CF	PRIORITY
7	Maintenance of public spaces and street furniture
1	Cleanliness of public space
3 <sup>b</sup>	General condition of vegetation, street trees and other planting
3 <sup>c</sup>	Vegetation and natural elements (street trees, planting, water etc.)
8	Outdoor restaurant, cafe and/or bar seating
2	Elements of the natural environment (views, vegetation, topography, water etc.)

CF	CONSIDERATION
12	Local history, heritage buildings or features
15	Public art, community art, water or light feature
18 <sup>a</sup>	Interaction with locals/ other people in the area (smiles, customer service etc.)
18 <sup>b</sup>	Physical safety (paths, cars, lighting etc.)

### LEGEND

- Vertical: Top 10 CF threshold
- Diagonal: Threshold showing attributes which PX rating is performing 10 pts worse than their CF ranking<sup>1</sup> (PX=CF+10)
- .... Equal CF rank and PX Score (PX=CF)
- Strength (Protect and build upon these attributes)
- Priority (Focus on improving these attributes)
- Consideration (Focus on improving these attributes AFTER all priorities have been addressed)

# EXECUTIVE SUMMARY - MEETING DARWIN 2030

Each of the 50 place attributes assessed by the Darwin community undertaking a PX Assessment have been aligned with the Darwin 2030 Strategic Directions to track performance and identify Community Place Priorities.

## THE SURVEYED STREETS ARE, ON AVERAGE, CLOSER THAN OTHER AUSTRALIAN MAIN STREETS TO DELIVERING THE EXPERIENCE DESCRIBED IN DARWIN 2030

As of 2019, the place attributes associated with each Strategic Direction are perceived as performing better in the streets surveyed in Darwin than in main streets surveyed around Australia.

AVERAGE PERFORMANCE (PX) BY STRATEGIC DIRECTION COMPARED WITH THE NATIONAL BENCHMARK

### LEGEND

- Surveyed locations aggregated average performance of the attributes related to this strategic direction
- National benchmark average performance of the attributes related to this strategic direction<sup>1</sup>

## ATTRIBUTES ASSOCIATED WITH A COOL, CLEAN AND GREEN CITY AND A VIBRANT AND CREATIVE CITY ARE NOT PERFORMING AS WELL AS THEY SHOULD

On average, the place experience offered by the surveyed locations is better than the national average. However, what really matters is how this experience relates to the community's values. At the moment, attributes related to these two Strategic Directions are not meeting people's expectations.

AVERAGE DIFFERENCE BETWEEN VALUES (CF RANK) AND PERFORMANCE (PX RANK)

The centre is where your place experience meets your community's values

# EXECUTIVE SUMMARY - COMMUNITY PLACE PRIORITIES

This page synthesises the research findings to provide Community Place Priorities for each of the Strategic Directions - these should be considered when planning investment in Darwin town centres.

**A CAPITAL CITY WITH BEST PRACTICE AND SUSTAINABLE INFRASTRUCTURE**

**IMPROVE THE QUALITY AND INCREASE THE AMOUNT OF SHADED AND CLEAN ACTIVE PATHWAYS AND PUBLIC TRANSPORT**

**PROVIDE HIGH QUALITY COMMUNAL AMENITIES IN TOWN CENTRES TO SUPPORT LONGER STAYS**

**A SAFE, LIVEABLE AND HEALTHY CITY**

**INCREASE THE LEVEL OF SERVICE FOR MAINTENANCE AND CLEANING IN TOWN CENTRES**

**SUPPORT THE STRENGTHENING OF SOCIAL TIES AND SUPPORT NETWORKS IN LOCAL COMMUNITIES**

**A COOL, CLEAN AND GREEN CITY**

**INVEST IN MORE STREET TREES AND PLANTING ACROSS TOWN CENTRES**

**CELEBRATE DARWIN'S UNIQUE CLIMATE, VEGETATION, AND NATURAL FEATURES AS AN AUTHENTIC POINT OF DIFFERENCE**

**A SMART AND PROSPEROUS CITY**

**FACILITATE AN INCREASE IN QUALITY OUTDOOR DINING AND SOCIAL SPACES**

**SUPPORT LOCAL ECONOMIES THROUGH AN INCREASED DIVERSITY AND QUALITY OF LOCALLY OWNED AND OPERATED BUSINESSES THAT SUPPORT COMMUNITIES**

**A VIBRANT AND CREATIVE CITY**

**PROTECT AND BUILD ON THE VALUED COMMUNITY ACTIVITIES OCCURRING IN TOWN CENTRES ACROSS THE LGA**

**HIGHLIGHT THE CULTURAL, HISTORIC, ECONOMIC AND PHYSICAL DIVERSITY THAT MAKES DARWIN UNIQUE**

# 1) MEASURING DARWIN 2030

THE NEXT SECTION INCLUDES:

- INTRODUCTION
- A. STRATEGIC DIRECTIONS PERFORMANCE
- B. COMMUNITY PLACE PRIORITIES

# INTRODUCTION - MEASURING DARWIN 2030

## WHAT IS DARWIN 2030?

The City of Darwin Strategic Plan: *Darwin 2030 – City for People. City of Colour* came in to force on July 1 2019. The plan sets out the City of Darwin's vision for the next 10 years, drawing on community wisdom, existing Council strategies and plans, commitments to and with key stakeholders, and clearly states the aspirations to be achieved by 2030.

The Strategic Plan's *Appendix A -Strategic Projects and Performance, Measuring Success* sets out a proposed framework for prioritising projects that best align with the vision for the city and as a system for measuring performance.

The City of Darwin engaged Place Score to develop this new decision-making and performance tracking framework. The objectives were to develop metrics for measuring the performance of the Strategic Directions and to set Community Place Priorities.

Together these have been used to develop a Project Prioritisation Tool and Reporting methodology for both baseline performance measurement and long-term progress tracking.

## THE MISSION

The mission the City of Darwin has set for itself is:

*"We will work with the community and partners, provide leadership, and deliver services that create opportunities to enhance the economic, cultural and environmental sustainability of Darwin."*

The City's Strategic Plan identifies five community values:

- **Diversity and Acceptance:** Embrace our identity through building on our multicultural and local heritage, creating a sense of belonging
- **Choice of Lifestyle:** Maintain our unique laid-back lifestyle, through a connected, active and safe community
- **Environment:** Integrated long-term planning, including sustainable and renewable energy resources, recycling and economically sound initiatives
- **Sense of community:** Recognise, enhance and celebrate our identity through active participation within the community
- **Equality:** Leadership that adopts and maintains collaborative and transparent decision making, involving listening and responding to the community as a whole

## THE STRATEGIC DIRECTIONS

To achieve the vision, City of Darwin has set five strategic directions:

### A CAPITAL CITY WITH BEST PRACTICE AND SUSTAINABLE INFRASTRUCTURE

Council will actively pursue opportunities to fund strategic projects through Public Private Partnerships, Joint Ventures, government grant programs and other suitable funding mechanisms.

### A SAFE, LIVEABLE AND HEALTHY CITY

The community needs to be able to access all spaces. Our parks and open spaces will be well-maintained, clean and accessible for all. Council will continue to influence planning decisions and work to increase that level of influence.

### A COOL, CLEAN AND GREEN CITY

By recognising our footprint on the earth, and utilising renewable energy, supplemented by reduced demand on energy, we will contribute to giving future generations a healthy environment. We will invest in energy efficiencies and renewable energy to reduce our ecological footprint, ensuring we contribute to a healthy environment for generations to come. Darwin will be recognised globally for innovative and smart design in clean energy and waste management.

### A SMART AND PROSPEROUS CITY

We will continue to work with the Northern Territory Government, business and industry and other partners to advance the local economy.

### A VIBRANT AND CREATIVE CITY

By embracing, celebrating and valuing the richness different groups bring to the city, Darwin will be a more attractive place for both residents and visitors. It will build a greater sense of community ownership, connectedness and belonging.

## BASELINE REPORT

This Baseline Report has four main objectives:

### IDENTIFYING HOW THE CITY OF DARWIN IS CURRENTLY PERFORMING

Using Place Score's Place attributes, this Baseline Report identifies how each Strategic Direction is currently contributing to place experience.

### IDENTIFYING INVESTMENT PRIORITIES

Using people's values and what they currently perceive as contributing negatively to their place experience, this report will identify Community Place Priorities for each Strategic Direction.

### INFORM THE PROJECT PRIORITISATION TOOL

The Community Place Priorities will then inform the matrix and process used to assess, scope and prioritise proposed projects for the City of Darwin.

### TRACK THE IMPACT OF INVESTMENT

The 2019 performance illustrated in this report will act as a baseline against which future results can be compared. This will allow the City of Darwin to measure how much of an impact its projects and investment have had on people's experience of place, and how close the city is to achieving its 2030 vision.

## DATA SOURCES

There are three main sources of data used in this report:

### CARE FACTOR SURVEY

Care Factor™ is a proprietary, values-capture tool that identifies the place attributes that are valued by the most number of respondents.

Data was collected face to face and online.

### PLACE EXPERIENCE (PX) ASSESSMENTS

A PX Assessment asks users of an area to assess each place attribute in terms of its impact on their personal enjoyment of the space.

Data was collected face to face.

### ABOUT THE OPEN-ENDED QUESTION

The open-ended question asks respondents to share their idea for change. The 25 word answers are then categorised by Place Score in different themes to identify what the community says it wants.

Open-ended questions are only collected online.

## PLACE ATTRIBUTES ALIGNMENT

Place Score captures community values and performance across 50 Place Attributes, 10 in each of five Place Dimensions, or categories.

The following table defines the rationale for the alignment of Place Score place attributes with each of the City of Darwin's Strategic Directions. Attributes have been selected to best reflect the definition of each Strategic Direction.

STRATEGIC DIRECTION	ALIGNMENT BRIEF	PLACE SCORE ATTRIBUTES (50/50)
<b>A Capital City With Best Practice and Sustainable Infrastructure</b>	Attributes related to hard infrastructure	7 attributes
<b>A Safe, Liveable and Healthy City</b>	Attributes associated with safety, community resilience, activation, and healthy lifestyle	15 attributes
<b>A Cool, Clean and Green City</b>	Attributes associated with comfort and vegetation	5 Attributes
<b>A Smart and Prosperous City<sup>1</sup></b>	Attributes related to the local economy	10 attributes
<b>A Vibrant and Creative City</b>	Attributes associated to uniqueness, things to do, diversity and local history	13 attributes

Notes: <sup>1</sup>There are no Place Score Place attributes related to Smart Cities.

# PART A- STRATEGIC DIRECTIONS PERFORMANCE

THIS SECTION PROVIDES A SUMMARY OF THE PERFORMANCE OF THE SURVEYED MAIN STREETS IN RELATION TO THE DARWIN 2030 STRATEGIC DIRECTIONS:

- A.1 STRATEGIC DIRECTIONS PERFORMANCE
- A.2 2019 BASELINE PERFORMANCE
- A.3 STRATEGIC DIRECTIONS PERFORMANCE BREAKDOWN
- A.4 PERFORMANCE CITY VS SUBURBS
- A.5 PERFORMANCE BY TOWN CENTRE
- A.6 PERFORMANCE BY AUDIENCES

# A.1 - STRATEGIC DIRECTIONS PERFORMANCE

## MEASURING THE STRATEGIC DIRECTIONS PERFORMANCE

12 main street environments have been assessed by the Darwin community via a PX Assessment. Respondents were asked to rate how their main street was performing against 50 different place attributes. Here, the results from the 12 main street PX Assessments have been combined to measure performance in relation to the Darwin 2030 Strategic Directions.

## WHAT THE 2019 BASELINE TELLS US:

**THE SURVEYED DARWIN STREETS ARE ON AVERAGE CLOSER THAN OTHER AUSTRALIAN MAIN STREETS TO DELIVERING THE EXPERIENCE DESCRIBED IN DARWIN 2030:**

On average, the place attributes associated with each strategic direction are perceived as performing better in the streets surveyed in Darwin than in main streets surveyed around Australia.

Based on the diversity of surveyed Darwin streets, your results have been compared to Place Score's National Street PX Benchmark. The benchmark includes a variety of typologies, densities and climate from across the country<sup>1</sup>.

**THE DIFFERENCE BETWEEN THE AVERAGE PERFORMANCE OF THE DIFFERENT STRATEGIC DIRECTIONS AT THE LGA LEVEL IS LIMITED**

With average scores ranging from 67 to 70/100, there are no major differences between the different categories.

Part B of this report will highlight differences within each strategic direction, across demographics and locations, and identify priorities based on your community's values.

## HOW ARE THE STRATEGIC DIRECTIONS PERFORMING?

## A.2 -2019 BASELINE PERFORMANCE

SURVEYED STREETS AVERAGE ATTRIBUTES PERFORMANCE BY STRATEGIC DIRECTION COMPARED TO THE NATIONAL BENCHMARK<sup>1</sup>

### LEGEND

- Surveyed locations aggregated average performance of the attributes related to this strategic direction
- National benchmark average performance of the attributes related to this strategic direction<sup>1</sup>

**Notes:** <sup>1</sup>National average sample used n=11210 (Oct 2019) in main street environments in QLD, NSW, NT, TAS, VIC and WA. PX Scores vary between 0 and 100. Scores above 70 are very good, 50-70 there is room for significant improvement, <50 urgent investment required.

## A.3 - STRATEGIC DIRECTION PERFORMANCE BREAKDOWN

### WHAT ARE THE HIGHEST AND LOWEST CONTRIBUTORS IN EACH STRATEGIC DIRECTIONS

The average performance of each of the 50 place attributes are displayed here, providing an overview of how, on average, people experience the 12 surveyed main streets, in relation to the strategic directions.

### WHAT THE 2019 BASELINE TELLS US:

#### A CAPITAL CITY WITH BEST PRACTICE AND SUSTAINABLE INFRASTRUCTURE

Existing active, public and private transport infrastructure are contributing positively to this strategic direction.

While facilities, street furniture and investment (both private and public) are all perceived as performing poorly. Improving these attributes has the potential to improve Darwin's main street experience.

#### A SAFE, LIVEABLE AND HEALTHY CITY

Place attributes related to the amount of public space and their features are performing well. However, place attributes related to social interactions and care are not performing as well.

Both cleanliness and the maintenance of public spaces are, on average, amongst the surveyed streets' worst performing place attributes. Making them some of the strategic direction's place attributes with the most room for improvement. Other areas that can be significantly improved include social interactions, access to fresh food businesses and physical safety.

#### A COOL, CLEAN AND GREEN CITY

Place attributes related to this strategic direction are performing in a similar manner, and are contributing positively to the place experience with potential for improvement. They are also performing better than the national benchmark.

#### A SMART AND PROSPEROUS CITY

Evening activities, alfresco dining, clusters of similar traders and the diversity of price points are amongst the top contributors to this strategic direction.

The place attributes with the most room for improvement relate to the care and pride of businesses (their condition and window dressing), their uniqueness, and the offer of everyday businesses (post office, banks etc.).

#### A VIBRANT AND CREATIVE CITY

The overall look and character of the surveyed main streets is, on average, Darwin's best performing place attribute and one of the strongest contributors to making the city an iconic destination.

However, your community perceives that there is room for improvement when it comes to public art, heritage and historical features, the overall uniqueness of public spaces and the cultural diversity of businesses.

*Note that these findings only relate to the absolute performance of each place attributes. Part B of this report will identify Community Place Priorities based on performance and values.*

### RANGE OF PERFORMANCE COMPARED TO THE NATIONAL BENCHMARK

The following table highlights the average performance of each Strategic Direction, the highest and lowest performing attributes, and how they compare to Place Score's national benchmark.

#### LEGEND

- Surveyed locations aggregated average performance of the attributes related to this strategic direction
- National benchmark average performance of the attributes related to this strategic direction

## A CAPITAL CITY WITH BEST PRACTICE AND SUSTAINABLE INFRASTRUCTURE

Attributes [# PX ranking]	Scores
Walking, cycling or public transport options #13	72
General condition of buildings #21	70
Car accessibility and parking #26	70
Amenities and facilities (toilets, water bubblers, parents rooms etc.) #33	66
Evidence of recent private investment (new buildings, painting etc.) #37	66
Street furniture (including benches, bins, lights etc.) #39	65
Evidence of recent public investment (new planting, paving, street furniture etc.) #45	61

## A SAFE, LIVEABLE AND HEALTHY CITY

Attributes [# PX ranking]	Scores
Free and comfortable group seating #4	78
Evidence of management (signage, information, street cleaners etc.) #5	76
Free and comfortable places to sit alone #6	76
Ease of walking around (including crossing the street, moving between destinations) #8	75
Sense of safety (for all ages, genders, day/night etc.) #10	74
Space for group activities or gatherings #11	73
Walking paths that connect to other places #15	72
Spaces suitable for specific activities (play, entertainment, exercise etc.) #18	71
Quality of public space (footpaths and public spaces) #20	71
Amount of public space (footpaths and public spaces) #27	69
Physical safety (paths, cars, lighting etc.) #35	66
Grocery and fresh food businesses #38	65
Interaction with locals/ other people in the area (smiles, customer service etc.) #41	64
Cleanliness of public space #42	63
Maintenance of public spaces and street furniture #48	59

## A COOL CLEAN AND GREEN CITY

### Attributes [# PX ranking]

### Scores

Elements of the natural environment (views, vegetation, topography, water etc.) <b>#12</b>	72
Vegetation and natural elements (street trees, planting, water etc.) <b>#19</b>	71
Physical comfort (impacts from noise, smells, temperature) <b>#25</b>	70
General condition of vegetation, street trees and other planting <b>#28</b>	69
Shelter/awnings (protection from sun, rain etc.) <b>#29</b>	69

## A SMART AND PROSPEROUS CITY

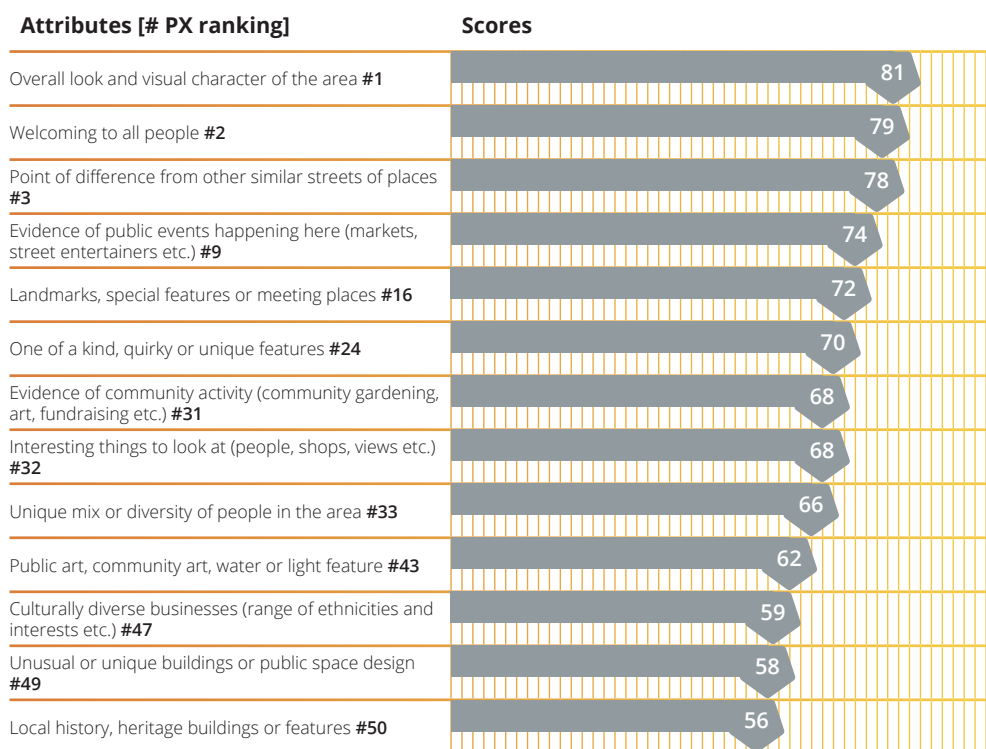

### Attributes [# PX ranking]

Businesses that reflect the local community and values <b>#44</b>	62
Shop window dressing (visual merchandising) <b>#46</b>	60

## A VIBRANT AND CREATIVE CITY

## A.4 - PERFORMANCE CITY VS SUBURBS

### ARE THE CITY AND THE SUBURBS PERFORMING SIMILARLY?

12 main streets environment have been assessed by the Darwin community. Five of the 12 locations are located in the CBD, the remaining seven are in suburban areas. The ratings for the city and suburban locations have been combined to highlight potential differences in place experience, in relation to the Strategic Directions.

### WHAT THE 2019 BASELINE TELLS US:

#### THE CITY CENTRE AVERAGE IS PERFORMING SLIGHTLY BETTER THAN THE SUBURBAN AVERAGE, HOWEVER SUBURBAN LOCATIONS WITH MARKETS ARE OUT-PERFORMING THE CITY

With an average PX score of 70/100, the city centre average is performing slightly better than the suburban average of 68/100.

The performance of different suburban locations varies greatly. Streets with nearby markets such as Casuarina Drive (77/100) and Parap Road (74/100) are perceived as offering a better place experience than the city centre. While surveyed locations in Karama (54/100) and Northlakes (63/100) are not performing as well as the suburban average (68/100).

#### A COOL, CLEAN AND GREEN CITY IS PERFORMING SIMILARLY IN BOTH THE CITY AND THE SUBURBS

#### A CAPITAL CITY WITH BEST PRACTICE AND SUSTAINABLE INFRASTRUCTURE, A SMART AND PROSPEROUS CITY AND A VIBRANT AND CREATIVE CITY ARE PERFORMING SLIGHTLY BETTER IN THE CITY CENTRE

This difference is, in part, explained by people feeling like there is more public investment in city centre locations (64/100 vs 59/100), and by the city centre locations featuring better street furniture (68/100 vs 61/100).

The city centre is also perceived as offering a slightly better mix of price points (75/100 vs 66/100), more businesses that reflect the community (66/100 vs 50/100), better window dressing (62/100 vs 57/100) and more opportunities to eat or drink alfresco (73/100 vs 67/100).

The city centre is also perceived as being slightly more unique through its diversity of people (71/100 vs 63/100), public art (66/100 vs 59/100) and unusual buildings and public spaces (60/100 vs 55/100).

#### PLACE ATTRIBUTES RELATED TO A SAFE, LIVEABLE AND HEALTHY CITY ARE PERFORMING SLIGHTLY BETTER IN THE SUBURBS

This may be in part due to people rating 'Evidence of maintenance' higher in the suburbs (80/100 vs 72/100). Other factors include the amount of public spaces (72/100 vs 65/100), their quality (72/100 vs 69/100), and people's sense of safety (76/100 vs 72/100).

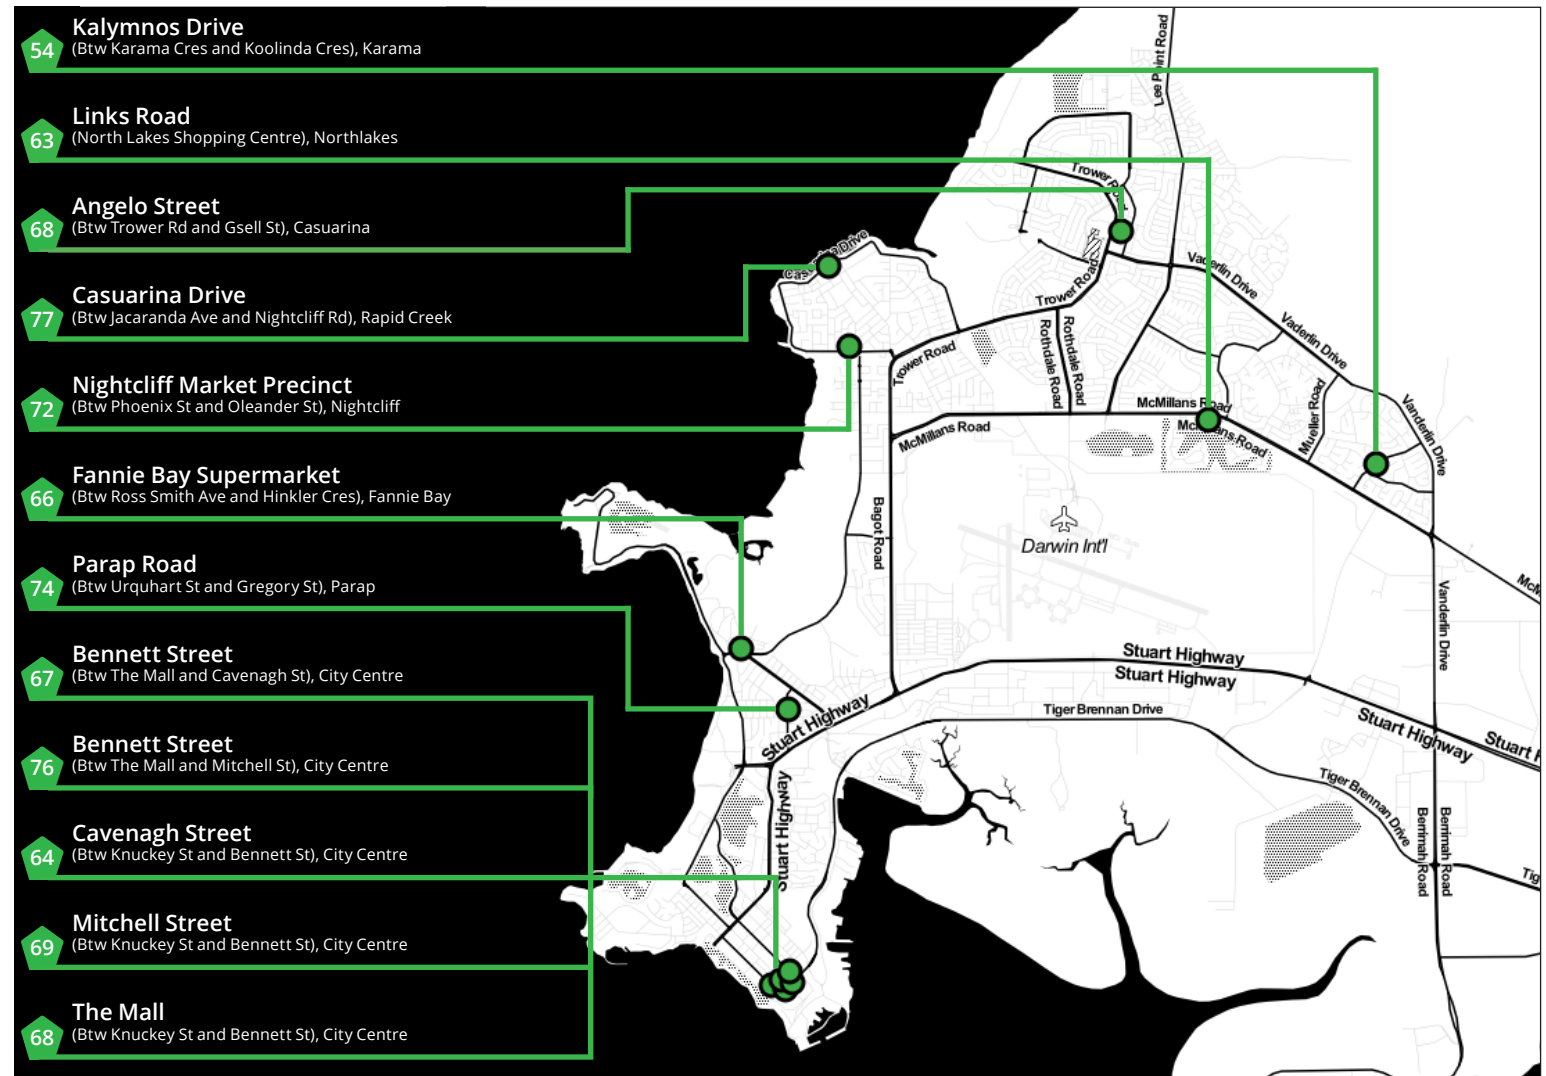

### AVERAGE PERFORMANCE OF EACH STRATEGIC DIRECTION

## MAPPING OVERALL PERFORMANCE

The following map illustrates the average place experience by suburb. The data used for each suburb is based on the PX Street surveys undertaken in a suburb's main street or streets. The data collected for your main streets is here extrapolated to the suburb scale to align with the Darwin 2030 Strategic Plan.

Most locations are between 200 and 400 meters in length to allow respondents to see the whole street when rating it. The following map is an example of what most location's limits and scale resembles:

# A.5 - PERFORMANCE BY TOWN CENTRE

## IS PLACE EXPERIENCE THE SAME ACROSS ALL LOCATIONS?

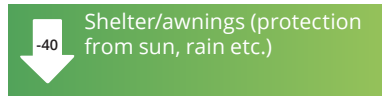

This section of the report highlights the most significant differences in performance across the city and identifies the place attributes behind these differences.

## WHAT THE 2019 BASELINE TELLS US:

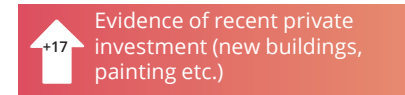

**PEOPLE IN KARAMA** rated every strategic direction lower than any other location (14 points lower on average)

The top 5 differences from the average are:

**PEOPLE IN RAPID CREEK** rated every strategic direction higher than the average (9 points higher on average)

The top 5 differences from the average are:

A CAPITAL CITY WITH BEST PRACTICE AND SUSTAINABLE INFRASTRUCTURE

A SAFE, LIVEABLE AND HEALTHY CITY

A COOL, CLEAN AND GREEN CITY

A SMART AND PROSPEROUS CITY

A VIBRANT AND CREATIVE CITY

## STRATEGIC DIRECTIONS PERFORMANCE BY TOWN CENTRE

The following table and graph illustrate the average performance of the attributes associated to a Strategic Direction, for each surveyed location. They also illustrate the difference between each location's performance and the average of all surveyed locations.

# A.6 - PERFORMANCE BY AUDIENCE

## IS EVERYONE'S PLACE EXPERIENCE THE SAME?

This section of the report reveals the different demographics' experience of streets across Darwin as a way to capture performance, which is then correlated to the Strategic Directions.

This section highlights a selection of demographic cohorts who have a significantly different place experience when compared to the average.

A CAPITAL CITY WITH BEST PRACTICE AND SUSTAINABLE INFRASTRUCTURE

A SAFE, LIVEABLE AND HEALTHY CITY

A COOL, CLEAN AND GREEN CITY

A SMART AND PROSPEROUS CITY

A VIBRANT AND CREATIVE CITY

## WHAT THE 2019 BASELINE TELLS US:

**WORKERS** rate every strategic direction lower than any other demographic (9 points lower on average)

The top 5 differences from the average are:

-22 Amenities and facilities (toilets, water bubblers, parents rooms etc.)

-20 Shop window dressing (visual merchandising)

-20 Spaces suitable for specific activities (play, entertainment, exercise etc.)

-20 Service businesses (post offices, libraries, banks etc.)

-20 Businesses that reflect the local community and values

**PEOPLE WITH CHILDREN** rate every strategic direction higher than the average (4 points higher on average)

The top 5 differences from the average are:

+11 Grocery and fresh food businesses

+9 Street furniture (including benches, bins, lights etc.)

+9 Shop window dressing (visual merchandising)

+8 Physical safety (paths, cars, lighting etc.)

+8 Culturally diverse businesses (range of ethnicities and interests etc.)

## STRATEGIC DIRECTIONS PERFORMANCE BY AUDIENCES

The following table and graph illustrate the average performance of the attributes associated to a strategic direction, for different demographics. The average performance of all respondents is also displayed for comparison purposes.

# PART B - COMMUNITY PLACE PRIORITIES

## THE NEXT SECTION INCLUDES:

- B.1 2019 COMMUNITY PLACE PRIORITIES
- B.2 UNDERSTANDING PLACE PRIORITIES
- B.3 PRIORITIES - A CAPITAL CITY WITH BEST PRACTICE AND SUSTAINABLE INFRASTRUCTURE
- B.4 PRIORITIES - A SAFE, LIVEABLE AND HEALTHY CITY
- B.5 PRIORITIES - A COOL, CLEAN AND GREEN CITY
- B.6 PRIORITIES - A SMART AND PROSPEROUS CITY
- B.7 PRIORITIES - A VIBRANT AND CREATIVE CITY

# B.1 - COMMUNITY PLACE PRIORITIES

Over 1500 Darwin residents participated in the 2019 Darwin Place Census completing either a Town Care Factor survey or Street PX Assessment. When the community's values are considered against place performance six individual attributes have been identified for investment consideration across the local government area. In addition, when all collected data has been considered, ten Community Place Priorities, aligned with Darwin 2030 Strategic Directions have been identified.

## PRIORITISING INVESTMENT TO DELIVER DARWIN 2030'S STRATEGIC DIRECTIONS

When planning investment in place, it is important to consider what is performing poorly in relation to what people value. Simply put, there is no point in investing in "apples" if people only care about "oranges".

The previous section of this report identified which place attributes, on average, are perceived as performing well or poorly in Darwin's town centres. This section aggregates the performance results with local community place values. The combination of performance and values provides the City of Darwin with investment priorities aligning with Darwin 2030s Strategic Directions.

The following pages provide the rationale and data that supports the Community Place Priorities identified on the following page.

## LGA-WIDE INVESTMENT ATTRIBUTES

There were 50 attributes considered by the Darwin community, of these only six have been identified as being both valued and significantly under-performing.

The following individual attributes should be considered for Council investment across all centres in the local government area:

- **Maintenance of public spaces and street furniture**
- **Cleanliness of public space**
- **General condition of vegetation, street trees and other planting**
- **Vegetation and natural elements (street trees, planting, water etc.)**
- **Outdoor restaurant, cafe and/or bar seating**
- **Elements of the natural environment (views, vegetation, topography, water etc.)**

## COMMUNITY PLACE PRIORITIES - STRATEGIC DIRECTIONS

Each of the 50 place attributes considered by the Darwin community have been aligned with the Darwin 2030 Strategic Directions.

The Strategic Directions with the biggest gap between values and place experience are:

- **A cool, clean and green city**
- **A vibrant and creative city**

The facing page synthesises the research findings to provide Community Place Priorities for each of the Strategic Directions - these should be considered when planning investment in Darwin centres.

Average difference between values (CF rank) and performance (PX rank)

The centre is where your place experience meets your community's values

**A CAPITAL CITY WITH BEST  
PRACTICE AND SUSTAINABLE  
INFRASTRUCTURE**

**A SAFE, LIVEABLE AND  
HEALTHY CITY**

**A COOL, CLEAN AND GREEN CITY**

**A SMART AND  
PROSPEROUS CITY**

**A VIBRANT AND CREATIVE CITY**

**IMPROVE THE  
QUALITY AND  
INCREASE THE  
AMOUNT OF SHADED  
AND CLEAN ACTIVE  
PATHWAYS AND  
PUBLIC TRANSPORT**

**INCREASE THE LEVEL  
OF SERVICE FOR

QUALITY OF  
LOCALLY OWNED  
AND OPERATED  
BUSINESSES  
THAT SUPPORT  
COMMUNITIES**

**HIGHLIGHT  
THE CULTURAL,  
HISTORIC, ECONOMIC  
AND PHYSICAL  
DIVERSITY THAT  
MAKES DARWIN  
UNIQUE**

## B.2 - UNDERSTANDING PLACE PRIORITIES

### HOW ARE THE PRIORITIES ESTABLISHED?

Based on how much they are valued (Care Factor rank) and the community's perception of their performance (PX rank), attributes have been classified under four different priority level:

- Strength
- Priority
- Consideration
- Neutral

STRENGTH	
A 'strength' is defined as a place attribute in the top 10 Care Factors with a performance rank, (rated through the PX Assessment and averaged across all locations), that is equal to or better than its Care Factor rank <sup>1</sup> . Simply put, it is highly valued and performing well.	
Those attributes that are strengths should be protected and built upon	
The strength place attributes for the Darwin LGA include:	
CF	Attribute
10 <sup>a</sup>	Overall look and visual character of the area
9	Welcoming to all people
10 <sup>b</sup>	Walking, cycling or public transport options
6	Evidence of public events happening here (markets, street entertainers etc.)

PRIORITY	
A 'priority' is defined as a place attribute in the top 10 Care Factors with a performance rank, (rated through the PX Assessment and averaged across all locations), that is lower than its Care Factor rank <sup>1</sup> . Simply put, it is highly valued and not performing well.	
Improving these attributes should be your utmost priority	
The priority place attributes for the Darwin LGA include:	
CF	Attribute
7	Maintenance of public spaces and street furniture
1	Cleanliness of public space
3 <sup>a</sup>	General condition of vegetation, street trees and other planting
3 <sup>c</sup>	Vegetation and natural elements (street trees, planting, water etc.)
8	Outdoor restaurant, cafe and/or bar seating
2	Elements of the natural environment (views, vegetation, topography, water etc.)

CONSIDERATION
A 'consideration' is defined as a place attribute that is not in the top 10 Care Factors with a performance rank, (rated through the PX Assessment and averaged across all locations), that is lower than its Care Factor rank <sup>1</sup> . Simply put, it is not highly valued but its performance could be highly improved.
Investment in these attributes should only be considered once the 'priority' place attributes have been addressed.
The consideration place attributes can be found in the next pages of this report.

NEUTRAL
A 'neutral' is defined as a place attribute that is not in the top 10 Care Factors with a performance rank, (rated through the PX Assessment and averaged across all locations), that is equal or better than its Care Factor rank <sup>1</sup> . Simply put, it is not highly valued and its performance is good or acceptable.
Investment in those attributes should not be considered at this stage.
The neutral place attributes can be found in the next pages of this report.

# PART B.3 - COMMUNITY PLACE PRIORITIES

A CAPITAL CITY WITH BEST PRACTICE AND SUSTAINABLE INFRASTRUCTURE

## B.3 PRIORITIES - A CAPITAL CITY WITH BEST PRACTICE AND SUSTAINABLE INFRASTRUCTURE

### COMMUNITY PLACE PRIORITIES:

**IMPROVE THE QUALITY AND INCREASE THE AMOUNT OF SHADED AND CLEAN ACTIVE PATHWAYS AND PUBLIC TRANSPORT**

**PROVIDE HIGH QUALITY COMMUNAL AMENITIES IN TOWN CENTRES TO SUPPORT LONGER STAYS**

Walking, cycling and public transport as well as many attributes associated with an active shared spaces are highly valued across the local government area. While they are seen as performing strongly in some of your town centres, there is still room for improvement.

Community ideas for change focused on improving active transport. More specifically, community members were proposing greenery as a way to shade footpaths, and increased maintenance to improve their general experience.

Investment in 'Walking, cycling and public transport options' is a high priority in Fannie Bay and Malak town centres, and is something to consider for Casuarina and Parap.

Interestingly, men, residents and students perceive active and public transport as a high priority.

Enhancements in the offer of facilities such as toilets or water bubblers should be considered in the City Centre, Karama, Malak and Parap town centres.

### PLACE ATTRIBUTES GRAPH

#### LEGEND

- Strength (Protect and build upon these attributes)
- Priority (Focus on improving these attributes)
- Consideration (Focus on improving these attributes AFTER all priorities have been addressed)
- Neutral (Do not focus on these attributes)
- Vertical: Top 10 CF threshold
- - Diagonal: Threshold showing attributes which PX rating is performing 10 pts worse than their CF ranking<sup>1</sup> ( $PX=CF+10$ )
- ..... Equal CF rank and PX Score ( $PX=CF$ )

#### CF STRENGTHS

10 Walking, cycling or public transport options

#### CF PRIORITY

N/A There are no 'priority' place attributes

#### CF CONSIDERATION

18 Amenities and facilities (toilets, water bubblers, parents rooms etc.)

34 Evidence of recent public investment (new planting, paving, street furniture etc.)

#### CF NEUTRAL

31 Car accessibility and parking

37 General condition of buildings

45 Street furniture (including benches, bins, lights etc.)

48 Evidence of recent private investment (new buildings, painting etc.)

## COMMUNITY IDEAS FOR CHANGE: DELIVERING SHADED AND CONVENIENT ACTIVE TRANSPORT INFRASTRUCTURE IS KEY

Place Score asked online survey respondents: 'What big or small idea do you have to bring Darwin's vision to life and make your local area a better place for you?'

The 25 word ideas for change were then classified in different themes to identify what the community had in mind.

323 community ideas were collected. Community Ideas related to this Strategic Direction are summarised here:

## PROPORTION OF COMMUNITY IDEAS BY THEME AND KEY DEMOGRAPHICS

#1

### More and/or better active transport infrastructure

50 answers (15.5%)

"Rewilding the verges and in between urban spaces and reclaiming valuable space from carparks and excess car lanes for active transport and native greenery."

MALE, 25-34 YEARS OLD

#2

### More, better and/or cheaper parking<sup>1</sup>

19 answers (5.9%)

"Plentiful car parking at reasonable rates. Encouragement of the arts and food markets. Regulations to enforce owners to maintain properties and get rid of eyesores."

MALE, 65-74 YEARS OLD

#3

### More and/or better public transport infrastructure

14 answers (4.3%)

"Better public transport, cycling paths, community garden areas in each suburb, better outdoor spaces near the beach with good shade cover."

FEMALE, 35-44 YEARS OLD

#4

### Less car dependency and/or repurposing car dedicated spaces

8 answers (2.5%)

"One way streets and angle parking [on one] side of the street freeing up area to plant more trees and vegetation."

MALE, 55-64 YEARS OLD

#5

### More and/or better accessibility

4 answers (1.2%)

"Making sure all walking tracks/paths are direct and easy to use for prams and wheelchair access."

FEMALE, 25-34 YEARS OLD

## LEGEND

### LEGEND

- Strength (Protect and build upon these attributes)
- Consideration (Focus on improving these attributes AFTER all priorities have been addressed)
- Priority (Focus on improving these attributes)
- Neutral (Do not focus on these attributes)

## COMMUNITY PLACE PRIORITIES BY AUDIENCES

This page uses the average rank gap of all attributes related to this strategic direction, for each demographic. A rank gap is the difference between the performance of different features of a place (PX) and the value people attach to each of these features (Care Factor).

The rank gap establishes the priority level of each attribute. When combined, the rank gap of multiple attributes can highlight how, on average, features related to a Strategic Direction are meeting the needs of different segments of your community.

A **positive rank gap** indicates that the attributes are on average **over-performing** when compared to how much they are valued.

A **negative rank gap** indicates that the attributes are on average **under-performing** when compared to how much they are valued.

## KEY FINDINGS:

- The place experience associated with this Strategic Direction is generally well aligned with community's values
- The few demographic groups that consider this Strategic Direction as under-performing only have one of two high priorities: active and public transport or amenities and facilities
- Attributes related to this Strategic Direction are over-performing the most for people with no children (rank gap of +6.6 pts)
- Attributes related to this Strategic Direction are under-performing the most for men, people aged 15-24, workers and students (rank gap of -0.9 pts)
- Improving amenities and facilities is a priority for workers and people with children
- Improving active and public transport networks is a priority for men, residents and students.

# PART B.4 - COMMUNITY PLACE PRIORITIES

A SAFE, LIVEABLE AND HEALTHY CITY

# B.4 PRIORITIES - A SAFE, LIVEABLE AND HEALTHY CITY

## COMMUNITY PLACE PRIORITIES:

**INCREASE THE LEVEL OF SERVICE FOR MAINTENANCE AND CLEANING IN TOWN CENTRES**

**SUPPORT THE STRENGTHENING OF SOCIAL TIES AND SUPPORT NETWORKS IN LOCAL COMMUNITIES**

Cleanliness and maintenance of public spaces are amongst your community's top values. However, people do not perceive your town centres as being clean and well looked-after.

Similarly, community ideas for change focused on improving people's sense of safety and the cleanliness of your town centres.

Investment in cleanliness and maintenance is a priority across the LGA. While efforts to improve the sense of safety should focus on the Casuarina, City Centre, Fannie Bay, Karama and Malak town centres. People aged 15-24 years old and workers were amongst the those feeling the least safe in your town centres.

Special attention should be given to the Malak town centre, as community members perceive that their physical safety is also at risk.

Interestingly, the Nightcliff community would value more or better footpaths that would connect their town centre to other points of interest.

- Neutral (Do not focus on these attributes)

## COMMUNITY PLACE PRIORITIES BY AUDIENCES

This page uses the average rank gap of all attributes related to this strategic direction, for each demographic. A rank gap is the difference between the performance of different features of a place (PX) and the value people attach to each of these features (Care Factor).

The rank gap establishes the priority level of each attribute. When combined, the rank gap of multiple attributes can highlight how, on average, features related to a Strategic Direction are meeting the needs of different segments of your community.

A **positive rank gap** indicates that the attributes are on average **over-performing** when compared to how much they are valued.

A **negative rank gap** indicates that the attributes are on average **under-performing** when compared to how much they are valued.

## KEY FINDINGS:

- Everyone agrees on cleanliness being a high priority. All demographics identified cleanliness of public space as a priority, while everyone also perceives maintenance as performing poorly
- 'Interaction with locals/ other people in the area' is not amongst the top valued place attributes, but everyone agrees that it could be improved
- Most attributes associated with this strategic direction are over-performing. This leads to the average being positive for almost all demographics. However, maintenance and safety remains a high priority for many demographics
- Attributes related to this Strategic Directions are over-performing the most for people aged 15-24 (rank gap of +6.8 pts)
- Attributes related to this Strategic Directions are under-performing the most for people aged 65+ (rank gap of -0.07 pts)
- Improving the sense of safety is a priority for people aged 15-24 and workers
- Improving 'Walking paths that connect to other places' is a priority for people aged 45-64 and people living in group household and others types of households

# PART B.5 - COMMUNITY PLACE PRIORITIES

A COOL, CLEAN AND GREEN CITY

# B.5 PRIORITIES - A COOL, CLEAN AND GREEN CITY

## COMMUNITY PLACE PRIORITIES:

INVEST IN MORE STREET TREES AND PLANTING ACROSS TOWN CENTRES

CELEBRATE DARWIN'S UNIQUE CLIMATE, VEGETATION, AND NATURAL FEATURES AS AN AUTHENTIC POINT OF DIFFERENCE

Abundant and well looked-after street trees and vegetation are an integral part of the Darwin community's ideal city. However, your town centres are not currently perceived as being green enough.

Similarly, the Darwin community highly values views, vegetation and water features. People in Fannie Bay, Karama and Malak town centres are proud of how unique nature is currently making their area unique. While all other town centres would highly benefit from more natural elements.

Community ideas for change focused on improving the condition and offer of green spaces, with some specifically mentioning their cooling effect.

Interestingly, Fannie Bay, Karama, Malak and Parap are the only town centres where respondents identified physical comfort or shelter and awnings as being something that may require some improvement.

## PLACE ATTRIBUTES GRAPH

- Priority (Focus on improving these attributes)
- Consideration (Focus on improving these attributes AFTER all priorities have been addressed)
- Neutral (Do not focus on these attributes)
- Vertical: Top 10 CF threshold
- Diagonal: Threshold showing attributes which PX rating is performing 10 pts worse than their CF ranking<sup>1</sup> (PX=CF+10)
- ..... Equal CF rank and PX Score (PX=CF)

### CF STRENGTHS

N/A There are no 'Strength' place attributes

### CF PRIORITY

- 3b** General condition of vegetation, street trees and other planting
- 3a** Vegetation and natural elements (street trees, planting, water etc.)
- 2** Elements of the natural environment (views, vegetation, topography, water etc.)

### CF CONSIDERATION

N/A There are no 'Consideration' place attributes

### CF NEUTRAL

- 25** Shelter/awnings (protection from sun, rain etc.)
- 28** Physical comfort (impacts from noise, smells, temperature)

## COMMUNITY IDEAS FOR CHANGE: A HIGH PERCENTAGE OF IDEAS RELATED TO THIS STRATEGIC DIRECTION, WITH NEARLY A THIRD OF ALL COMMUNITY IDEAS FOR CHANGE RELATING TO IMPROVING VEGETATION AND GREEN SPACES

Place Score asked online survey respondents: 'What big or small idea do you have to bring Darwin's vision to life and make your local area a better place for you?'

The 25 word ideas for change were then classified in different themes to identify what the community had in mind.

323 community ideas were collected. Community Ideas related to this Strategic Direction are summarised here:

## PROPORTION OF COMMUNITY IDEAS BY THEME AND KEY DEMOGRAPHICS

#1

### More and/or better parks and greenery

91 answers (28.2%)

"Green spaces. Looks appealing, cooling, environmentally friendly, tropical. Too much concrete in the city. Lets bring back some colour. Greenery & colourful art."  
FEMALE, 35-44 YEARS OLD

#2

### Improve comfort (noise, smell, temperature)

39 answers (12.9%)

"More plants for shade!"  
MALE, 35-44 YEARS OLD

#3

### More and/or better sustainable actions and behaviours

31 answers (9.6%)

"Embrace the Darwin tropical environment and lush surroundings. We are naturally a green city so let's also be environmentally-friendly and sustainable."  
FEMALE, 25-34 YEARS OLD

#4

### Celebrate and/or protect the topography and landscape

14 answers (4.3%)

"Great Walking paths with views of natural beauty like Fannie Bay and Nightcliff. We have the habitat to grow beautiful green spaces, let's do it!"  
FEMALE, 35-44 YEARS OLD

#5

### Celebrate and/or protect the fauna and flora

14 answers (4.3%)

"Install more native plants, shelters for wildlife and walkable areas that make residents feel safe to be in and explore."  
FEMALE, 15-24 YEARS OLD

## LEGEND

- Percentage of ideas for change related to a specific theme by demographic

## COMMUNITY PLACE PRIORITIES BY TOWN CENTRE

This table identifies the level of priority for each place attribute within this Strategic Direction.

	Elements of the natural environment (Views, vegetation, topography, water etc.)	General condition of vegetation, street trees and other planting	Physical comfort (Impacts from noise, smells, temperature)	Shelter/awnings (protection from sun, rain etc.)	Vegetation and natural elements (street trees, planting, water etc.)
Darwin Average	Priority	Priority	Neutral	Neutral	Priority
Casuarina	Priority	Priority	Neutral	Neutral	Priority
City Centre Average	Priority	Priority	Neutral	Neutral	Priority
Fannie Bay <sup>3</sup>	Strength	Priority	Consideration	Neutral	Priority
Karama	Strength	Priority	Neutral	Consideration	Strength
Malak (including Mararra and Northlakes area)	Strength	Priority	Consideration	Neutral	Strength
Nightcliff	Priority	Priority	Neutral	Neutral	Priority
Parap	Priority	Strength	Neutral	Consideration	Priority
Rapid Creek	Priority	Strength	Neutral	Neutral	Priority

### LEGEND

- Strength (Protect and build upon these attributes)
- Priority (Focus on improving these attributes)
- Consideration (Focus on improving these attributes AFTER all priorities have been addressed)
- Neutral (Do not focus on these attributes)

## COMMUNITY PLACE PRIORITIES BY AUDIENCES

This page uses the average rank gap of all attributes related to this strategic direction, for each demographic. A rank gap is the difference between the performance of different features of a place (PX) and the value people attach to each of these features (Care Factor).

The rank gap establishes the priority level of each attribute. When combined, the rank gap of multiple attributes can highlight how, on average, features related to a Strategic Direction are meeting the needs of different segments of your community.

A **positive rank gap** indicates that the attributes are on average **over-performing** when compared to how much they are valued.

A **negative rank gap** indicates that the attributes are on average **under-performing** when compared to how much they are valued.

## KEY FINDINGS:

- No one is satisfied with the current situation. Every demographic has a negative average performance gap. Meaning your community values place attributes related to greenery and nature more than what the City of Darwin's main streets are currently offering
- Everyone values well-looked after nature and vegetation. Some segments of your community perceive these aspect of their town centre as performing well. However, these features are so highly valued that their performance must be extraordinary for them not to be a priority for investment
- Attributes related to this Strategic Directions are under-performing for every demographic. However, workers have the best balance between performance and values (rank gap of -5 pts)
- Visitors have the worst balance between what they care about and how their main street is performing (rank gap of -14 pts)

# PART B.6 - COMMUNITY PLACE PRIORITIES

A SMART AND PROSPEROUS CITY

## B.6 PRIORITIES - A SMART AND PROSPEROUS CITY

### COMMUNITY PLACE PRIORITIES:

**FACILITATE AN INCREASE IN QUALITY  
OUTDOOR DINING AND SOCIAL SPACES**

**SUPPORT LOCAL ECONOMIES THROUGH  
AN INCREASED DIVERSITY AND QUALITY  
OF LOCALLY OWNED AND OPERATED  
BUSINESSES THAT SUPPORT COMMUNITIES**

Outdoor restaurant, cafe and bar seating are important to the Darwin community. At the moment, people feel like they can easily eat alfresco in the City Centre. However, more opportunities to catch-up with friend and family in the outdoors would be appreciated in Fannie Bay, Karama and Parap town centres.

The Karama town centre would benefit from a better night-time economy, while existing things to do in the evening should be protected and celebrated in Casuarina, the City Centre and Malak. Evening activities are especially important to men, people aged 15-44, workers and people with no children.

Improvements to the general condition of businesses and shopfronts should only be considered for Casuarina, the City Centre, and Karama. While a focus on the development of local businesses, or businesses that reflect the community could be considered for the Fannie Bay, Karama, Malak and Rapid Creek town centres.

Community ideas for change focused on increasing the offer of things to do, from retail to dining.

N/A There are no 'Strength' place attributes

#### CF PRIORITY

8 Outdoor restaurant, cafe and/or bar seating

#### CF CONSIDERATION

25 General condition of businesses and shopfronts  
31 Businesses that reflect the local community and values

#### CF NEUTRAL

12 Things to do in the evening (shopping, dining, entertainment etc.)  
24 A cluster of similar businesses (food, cultural traders, fashion etc.)  
39 Service businesses (post offices, libraries, banks etc.)  
40 Unusual or unique businesses/shops  
45 Buildings and shop fronts  
48 Diversity of price points (\$ to \$\$\$)  
50 Shop window dressing (visual merchandising)

## COMMUNITY IDEAS FOR CHANGE: A HIGHER PERCENTAGE OF YOUNGER RESPONDENTS' IDEAS RELATED TO THIS STRATEGIC DIRECTION, WITH LEISURE, ENTERTAINMENT AND RETAIL OPTIONS TAKING THE TOP SPOT

Place Score asked online survey respondents: 'What big or small idea do you have to bring Darwin's vision to life and make your local area a better place for you?'

The 25 word ideas for change were then classified in different themes to identify what the community had in mind.

323 community ideas were collected. Community Ideas related to this Strategic Direction are summarised here:

## PROPORTION OF COMMUNITY IDEAS BY THEME AND KEY DEMOGRAPHICS

**#1**

**More and/or better leisure, entertainment and retail options**

50 answers (15.5%)

"Bring more cafe and restaurants around our foreshore [and] our beaches"

FEMALE, 35-44 YEARS OLD

**#2**

**Improve commercial buildings occupancy and/or employment opportunities**

20 answers (6.2%)

"Give arts businesses low/free rent for their first 12-24 months in under-utilised buildings in the CBD to give it some life. See Newcastle, Docklands etc."

MALE, 25-34 YEARS OLD

**#3**

**More and/or better tourism infrastructure**

17 answers (5.3%)

"I really feel that Darwin needs a marathon 42 K run in the dry season. It would boost tourism and bring people together!"

FEMALE, 25-34 YEARS OLD

**#4**

**Increase night-time and weekend economy**

11 answers (3.4%)

"Friday night food market along esplanade or mall, combined with late night shopping to get more people coming into the city or staying after work."

FEMALE, 25-34 YEARS OLD

**#5**

**More and/or better local businesses**

8 answers (2.5%)

"More support required for local businesses. Safer places within the city to go at night. Other dining/event options."

FEMALE, 45-54 YEARS OLD

## COMMUNITY PLACE PRIORITIES BY AUDIENCES

This page uses the average rank gap of all attributes related to this strategic direction, for each demographic. A rank gap is the difference between the performance of different features of a place (PX) and the value people attach to each of these features (Care Factor).

The rank gap establishes the priority level of each attribute. When combined, the rank gap of multiple attributes can highlight how, on average, features related to a Strategic Direction are meeting the needs of different segments of your community.

A **positive rank gap** indicates that the attributes are on average **over-performing** when compared to how much they are valued.

A **negative rank gap** indicates that the attributes are on average **under-performing** when compared to how much they are valued.

## KEY FINDINGS:

- On average attributes related to this strategic direction are over-performing.
- Every demographic, with the exception of workers, have a positive rank gap.
- Most people agree on the importance of improving outdoor trading. 'Outdoor restaurant, cafe and/or bar seating' is the highest investment priority for most demographics.
- Attributes related to this Strategic Directions are over-performing the most for people aged 15-24 (rank gap of +7.7 pts)
- Attributes related to this Strategic Directions are under-performing the most for people aged 65+ (rank gap of -2.9 pts)
- Interestingly, 'Things to do in the evening' is currently perceived as a strength by men, people aged 15-44, people born overseas, workers, students, and households with no children.

# PART B.7 - COMMUNITY PLACE PRIORITIES

A VIBRANT AND CREATIVE CITY

# B.7 PRIORITIES - A VIBRANT AND CREATIVE CITY

## COMMUNITY PLACE PRIORITIES:

PROTECT AND BUILD ON THE VALUED  
COMMUNITY ACTIVITIES OCCURRING IN  
TOWN CENTRES ACROSS THE LGA

HIGHLIGHT THE CULTURAL, HISTORIC,  
ECONOMIC AND PHYSICAL DIVERSITY THAT  
MAKES DARWIN UNIQUE

Darwin's overall look and visual character is perceived as something to be proud of. The city's character is also largely expressed via social interactions, mainly through public events and people's friendliness.

However, the Darwin community would benefit from physical representations of its unique character. One way the community has identified to do so is through public art and references to local history. This would be especially appreciated in the City Centre, Karama, Malak, Parap and Rapid Creek town centres.

Community ideas for change focused on increasing the offer of artistic features, especially those that would reflect each area's uniqueness and Darwin's history. Community members also asked for more occasions to meet their neighbours and connect.

## COMMUNITY IDEAS FOR CHANGE: MURALS, ART INSTALLATIONS OR OTHER UNIQUE FEATURES THAT CELEBRATE DARWIN, AND MORE OCCASIONS FOR PEOPLE TO MEET AND KNOW EACH OTHER ARE THE MOST COMMON IDEAS RELATED TO THIS STRATEGIC DIRECTION

Place Score asked online survey respondents: 'What big or small idea do you have to bring Darwin's vision to life and make your local area a better place for you?'

The 25 word ideas for change were then classified in different themes to identify what the community had in mind.

323 community ideas were collected. Community Ideas related to this Strategic Direction are summarised here:

## PROPORTION OF COMMUNITY IDEAS BY THEME AND KEY DEMOGRAPHICS

#1

### More and/or better unique local features

41 answers (12.7%)

"Bring Darwin's amazing street art to the suburbs too, plant more trees, create more water features and provide recycling bins alongside rubbish bins."  
FEMALE, 45-54 YEARS OLD

#2

### Improve sense of belonging and interactions between residents

37 answers (11.5%)

"Creating spaces and events to create an atmosphere of community and togetherness, as Darwin is a transient city"  
FEMALE, 15-24 YEARS OLD

#3

### More and/or better arts and culture facilities

23 answers (7.1%)

"Art and live music in the CBD. Tax concessions for venues that support live music and social interaction."  
MALE, 35-44 YEARS OLD

#4

### More and/or better consideration and inclusion of diversity

14 answers (4.3%)

"Support our Indigenous and multicultural community organisations to offer music, art, history, etc in pop up mode in all our empty shops."  
FEMALE, 65-74 YEARS OLD

#5

### Celebrate and/or protect heritage

10 answers (3.1%)

"Provide an audible tour of Darwin's history and link all the main attractions for locals and tourists to take part via an app."  
FEMALE, 25-34 YEARS OLD

## COMMUNITY PLACE PRIORITIES BY AUDIENCES

This page uses the average rank gap of all attributes related to this strategic direction, for each demographic. A rank gap is the difference between the performance of different features of a place (PX) and the value people attach to each of these features (Care Factor).

The rank gap establishes the priority level of each attribute. When combined, the rank gap of multiple attributes can highlight how, on average, features related to a Strategic Direction are meeting the needs of different segments of your community.

A **positive rank gap** indicates that the attributes are on average **over-performing** when compared to how much they are valued.

A **negative rank gap** indicates that the attributes are on average **under-performing** when compared to how much they are valued.

## KEY FINDINGS:

- Everyone agrees that there is room for improvement. Every demographic has a negative gap between people's values and the performance of their town centre.
- Local history or heritage features is more important to some than others. People aged 45+, those born in Australia, residents and visitors all see it as a high priority.
- Some demographics are not satisfied with current public events. Workers, students and parents would like to see some improvements in regards to public events in their town centre.
- Attributes related to this Strategic Directions are under-performing for every demographic. However, people born overseas have the best balance between performance and values (rank gap of -0.8 pts)
- People living in a group household or other type of household have the worst balance between what they care about and how their main street is performing (rank gap of -8 pts)

## 2) COMMUNITY INSIGHTS REPORT

THIS SECTION OF THE REPORT INCLUDES:

- PART A - AN OVERVIEW OF CARE FACTOR AND PX ASSESSMENT RESULTS
- PART B - DETAILED CARE FACTOR RESULTS
- PART C - DETAILED PX ASSESSMENT RESULTS
- PART D- DETAILED RESULTS AND PRIORITIES BY TOWN CENTRE

# A.1 - ABOUT THE RESPONDENTS

Data was collected via online and face-to-face surveys during the period of 23 of July and 15 of September 2019. A total of 1574 people participated.

## CONFIDENCE LEVEL:

Unless noted otherwise, a **95% confidence level** can be expected for all results, with a margin of error of  $\pm 10\%$  for Care Factor data, and a standard error of  $\pm 5.8\text{pts}$  for PX data<sup>3</sup>.

	Demographic	Low Target	Achieved	Remark
CF	LGA	n = 380 for $\pm 5\%$ at 95% Confidence	n = 1125	Above target
	15-24 yrs	14.7% $\pm 5\%$	8.3%	1.4% below target margin
	25-44 yrs	44.5% $\pm 5\%$	48.1%	Target Achieved
	45-64 yrs	29.8% $\pm 5\%$	33.1%	Target Achieved

## CARE FACTOR

*Which place attributes are most important to you in your ideal town centre?*

A Care Factor survey requires respondents to prioritise the place attributes that are the most important to them. In turn, this reveals which out of the 50 Place Attributes are the most valued by the community.

Data was collected for nine Town Centres. Data has been coded using the answers of people residing in the suburb of the town centre, respondents associated with the town centre (workers, visitors, students), as well as people residing in the immediate catchment of the Town Centre. The following map is an example of the Casuarina catchment area:

## PX ASSESSMENTS

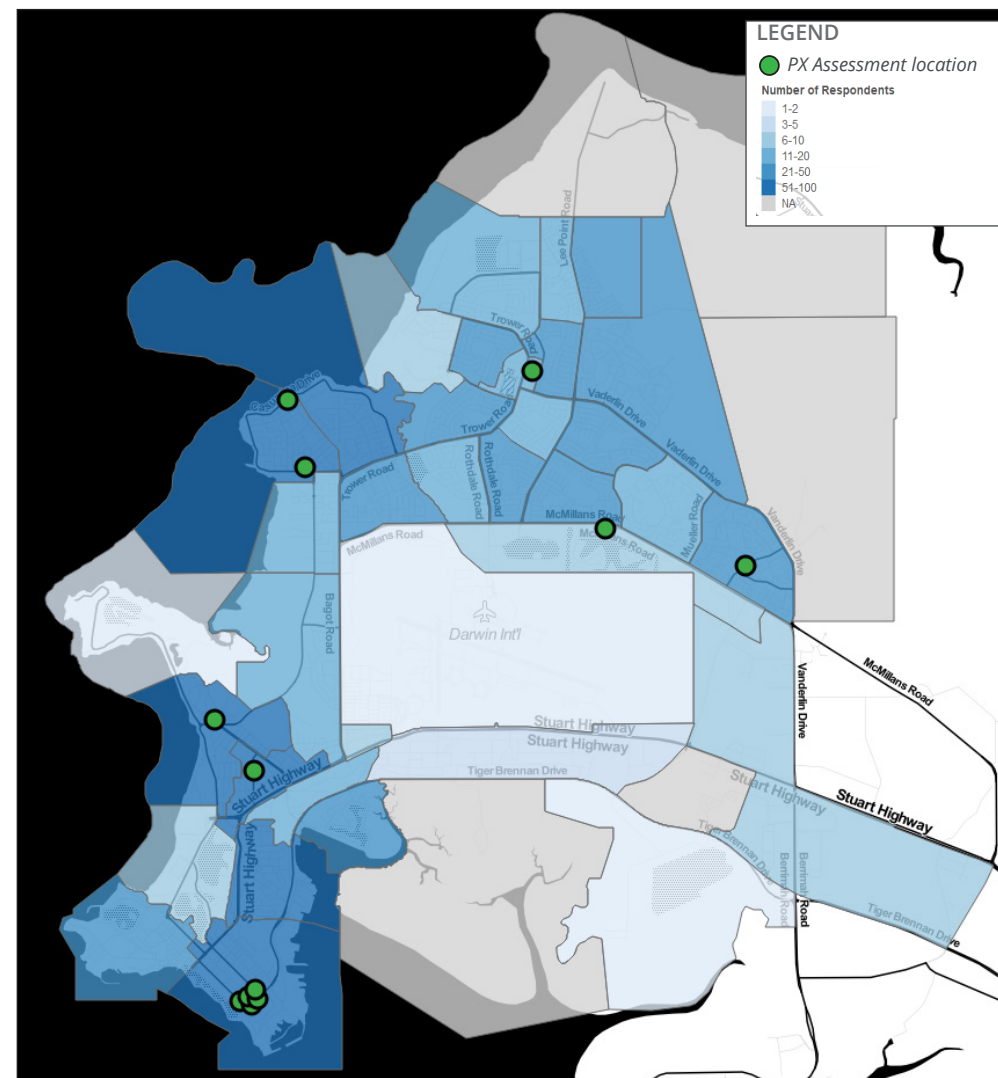

*How is each place attribute impacting your personal enjoyment of this place?*

12 main street environments have been assessed by the Darwin community. Respondents were asked to rate how their main street performs against 50 different place attributes.

A Street PX Assessment is an observation study, which means most locations are between 200 and 400 meters in length to allow respondents to see the whole street when rating it. The following map is an example of what most location's limits and scale resemble:

## MAP OF CARE FACTOR DATA AND PX ASSESSMENT LOCATIONS

## A.2 - DARWIN AT A GLANCE

**carefactor**  
town centre

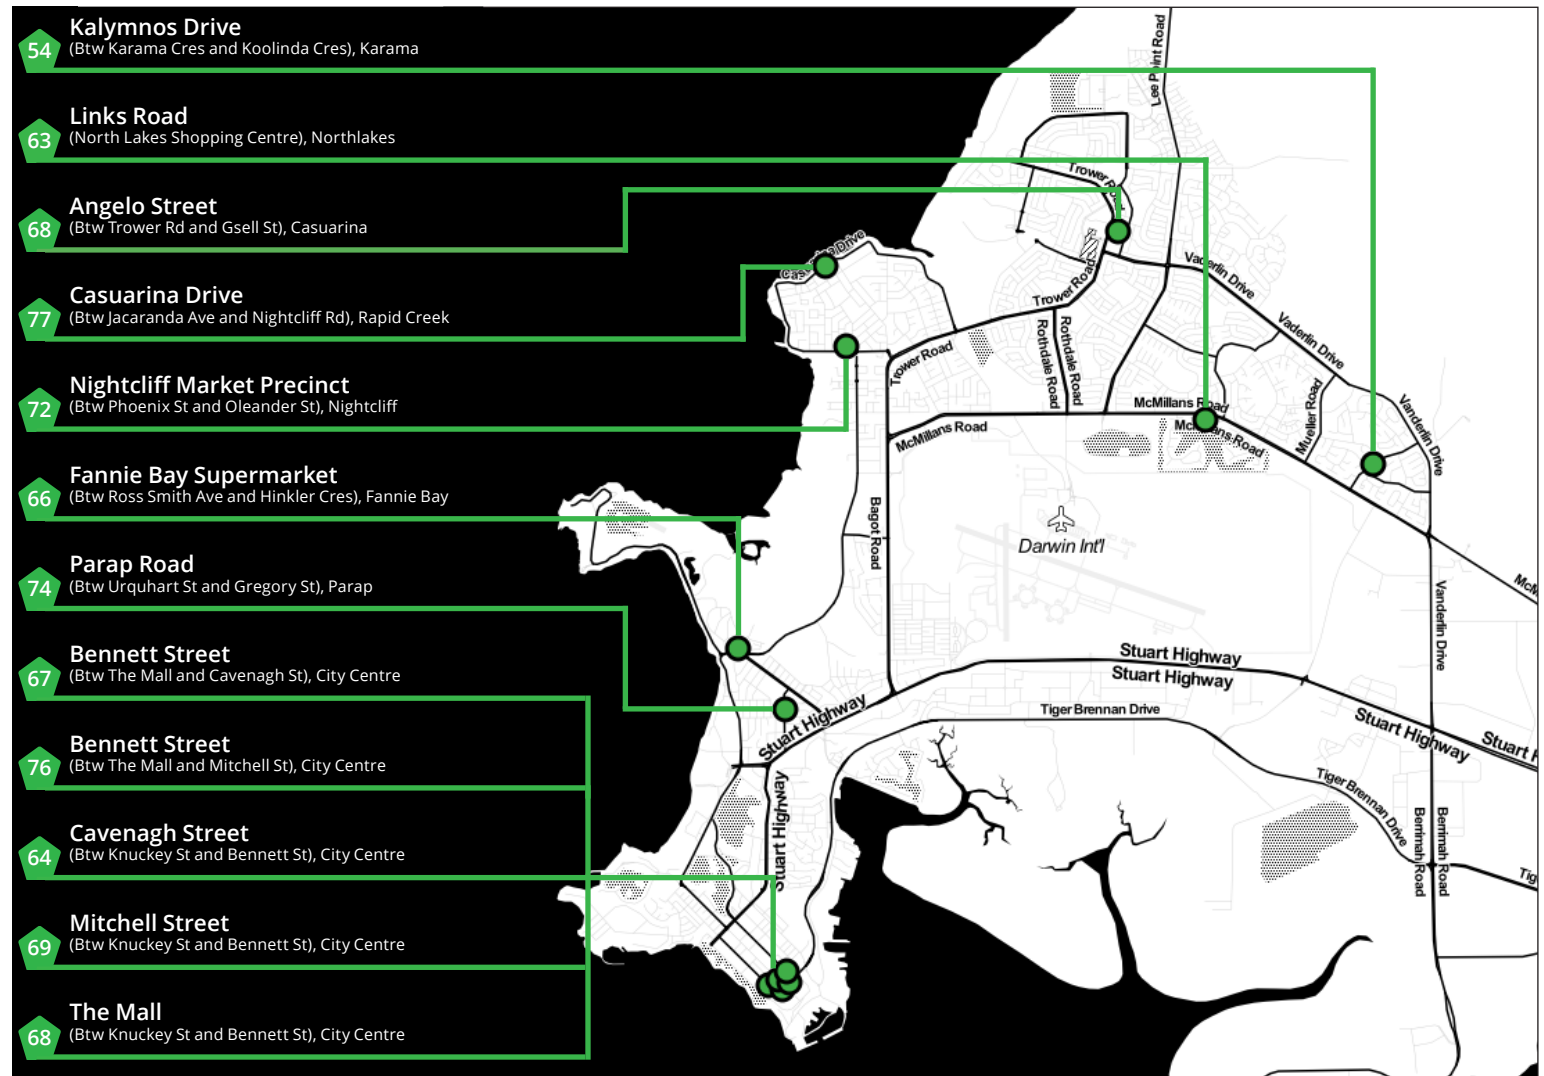

The Care Factor survey invites respondents to prioritise the place attributes that are most important to them in their ideal main street or town centre environment.

The following 5 attributes were select by the majority of your community as being important to them in their ideal town centre:

RANK	ATTRIBUTE	% OF n
#1	Cleanliness of public space	66%
#2	Elements of the natural environment (views, vegetation, topography, water etc.)	64%
#3	Vegetation and natural elements (street trees, planting, water etc.)	58%
#3	General condition of vegetation, street trees and other planting	58%
#3	Sense of safety (for all ages, genders, day/night etc.)	58%

**PXassessment**  
street

A PX (Place Experience) Assessment is an observation study that asks respondents to rate how different aspects of a street are performing, resulting in a PX Score.

## LOOKING AFTER PUBLIC SPACES AND VEGETATION ARE THE HIGHEST PRIORITIES FOR THE DARWIN LGA

These tables and graph illustrate the Darwin LGA's average strengths, priorities and considerations.

**STRENGTHS** should be celebrated and protected.

**PRIORITIES** identify the aspects of your town centres that are important to people but are currently under-performing. Improving these attributes will have the most significant impact on your community.

**CONSIDERATIONS** identify attributes to look-out for, they are negatively affecting your town centre and can become more significant issues if more people start caring about them.

*It should be noted that these priorities are based only on the surveyed streets, the average includes the results of five City Centre locations. Town Centre specific priorities can be found in the next section of this report.*

### LEGEND

-- Vertical: Top 10 CF threshold

Diagonal: Threshold showing attributes which PX rating is performing 10 pts worse than their CF ranking<sup>1</sup> (PX=CF+10)

..... Equal CF rank and PX Score (PX=CF)

**Strength** (Protect and build upon these attributes)  
**Priority** (Focus on improving these attributes)  
**Consideration** (Focus on improving these attributes AFTER all priorities have been addressed)

CF	STRENGTH
10 <sup>a</sup>	Overall look and visual character of the area
9	Welcoming to all people
10 <sup>b</sup>	Walking, cycling or public transport options
6	Evidence of public events happening here (markets, street entertainers etc.)
3 <sup>a</sup>	Sense of safety (for all ages, genders, day/night etc.)

CF	PRIORITY
7	Maintenance of public spaces and street furniture
1	Cleanliness of public space
3 <sup>b</sup>	General condition of vegetation, street trees and other planting
3 <sup>c</sup>	Vegetation and natural elements (street trees, planting, water etc.)
8	Outdoor restaurant, cafe and/or bar seating
2	Elements of the natural environment (views, vegetation, topography, water etc.)

CF	CONSIDERATION
12	Local history, heritage buildings or features
15	Public art, community art, water or light feature
18 <sup>a</sup>	Interaction with locals/ other people in the area (smiles, customer service etc.)
18 <sup>b</sup>	Physical safety (paths, cars, lighting etc.)

## A.3 - PRIORITIES BY TOWN CENTRE

### MOST TOWN CENTRES ALIGN ON THE IMPORTANCE OF IMPROVING CLEANLINESS AND GREENERY

The following table highlights the PX Score and Top three priorities of each location where both values and performance were captured:

TOWN CENTRE (CF)	STREET LOCATIONS (PX)	PX SCORE	PRIORITY 1	PRIORITY 2	PRIORITY 3
Darwin Average	All surveyed locations	68	Maintenance of public spaces and street furniture	Cleanliness of public space	General condition of vegetation, street trees and other planting

## A.4 - HOW DO YOU COMPARE?

### DARWIN'S AVERAGE IS PERFORMING ABOVE THE NATIONAL BENCHMARK

Your PX Scores acts as a benchmark to track liveability performance over time and allows for comparison against other locations. The combined PX results of surveyed Darwin streets is here compared to a other states across Australia.

#### PX Scores:

**70** Victorian Average

**68** Surveyed Darwin Streets Average

**65** National Average

**63** New South Wales Average

**59** Western Australian Average

**56** Queensland Average

YOUR TOP 5 ATTRIBUTES COMPARED TO THE NATIONAL AVERAGE ARE:		DIFFERENCE FROM NATIONAL AVERAGE
Things to do in the evening (shopping, dining, entertainment etc.)		<b>+16.9</b>
Evidence of public events happening here (markets, street entertainers etc.)		<b>+15.2</b>
Point of difference from other similar streets of places		<b>+14.8</b>
Free and comfortable group seating		<b>+14.4</b>
Car accessibility and parking		<b>+12.3</b>

YOUR BOTTOM 5 ATTRIBUTES COMPARED TO THE NATIONAL AVERAGE ARE:		DIFFERENCE FROM NATIONAL AVERAGE
Culturally diverse businesses (range of ethnicities and interests etc.)		<b>-9.3</b>
Businesses that reflect the local community and values		<b>-7.0</b>
Interaction with locals/ other people in the area (smiles, customer service etc.)		<b>-6.9</b>
Maintenance of public spaces and street furniture		<b>-6.8</b>
Cleanliness of public space		<b>-5.4</b>

# PART B - TOWN CENTRE CARE FACTOR

YOUR CARE FACTOR DATA ACTS AS A 'PLACE CENSUS', IDENTIFYING WHAT IS MOST IMPORTANT TO YOUR COMMUNITY REGARDING THEIR IDEAL TOWN CENTRE. THE DATA IS VALID FOR 3-5 YEARS AND CAN BE USED FOR A VARIETY OF STRATEGIC AND TACTICAL PROJECTS.

# B.1 - TOWN CENTRE CARE FACTOR SHARED VALUES

## OUR COMMUNITY'S TOWN CENTRE VALUES

This section of the report summarises the results of the Town Centre Care Factor survey that was collected between 24 July and 15 of September 2019. A total of 1125 people participated, both online and face to face.

Data was collected for nine Town Centres using the answers of people residing in the suburb of the town centre, respondents associated with the town centre (workers, visitors, students) as well as people residing in the immediate catchment of the Town Centre.

A Care Factor survey requires respondents to prioritise the place attributes that are the most important to them. In turn, this reveals which out of the 50 Place Attributes are the most valued by the community.

The following section highlights your community's values:

- For the Darwin LGA
- By demographic groups
- By Ward
- By Town Centre catchment

## ABOUT THE RESPONDENTS

### CARE FACTOR DATA

Data was collected via online and face-to-face surveys during the period of 24 of July and 15 of September 2019. A total of 1125 people participated.

New Zealand	2.0%

## THE FIVE PLACE DIMENSIONS ARE:

### CARE

How well a place is managed, maintained and improved. It considers care, pride, personal and financial investment in the area.

### LOOK & FUNCTION

Physical characteristics of a place: how it looks and works, the buildings, public space and vegetation.

### SENSE OF WELCOME

The social characteristics of a place, and how inviting it feels to a range of people regardless of age, income, gender, ethnicity or interests.

### THINGS TO DO

Activities, events and inviting spaces to spend time in a place that might lead to a smile or a new friend.

### UNIQUENESS

Physical, social, cultural or economic aspects of an area that make a place interesting, special or unique.

## WHAT DO WE ALL CARE ABOUT?

The 1125 Town Centre Care Factor respondents were aligned around the following four themes:

### 1) ABUNDANCE OF UNIQUE GREEN SPACES AND NATURAL FEATURES

Three of your LGA's top 5 Care Factors are related to nature and greenery. Your community highly values elements of the natural environment and how they are cared for.

*Do we all agree?*

- All wards and town centre catchments agree on the importance of nature and greenery
- The Chan Ward is where most people selected these attributes as being important to them

### 2) ATTRACTIVE AND WELL MAINTAINED PUBLIC SPACES

Cleanliness is your community's top Care Factor. The Darwin community also identified the maintenance of public spaces and street furniture as being important to them.

*Do we all agree?*

- 'Cleanliness of public space' is in every demographic and location's top five Care Factors
- 'Maintenance of public spaces and street furniture' is in every location and ward's top 10 Care Factors

### 3) SOCIAL AND SAFE SHARED ENVIRONMENTS

Your community values spaces where everyone can feel safe and welcomed.

*Do we all agree?*

- 'Sense of safety (for all ages, genders, day/night etc.)' is most valued by respondents in the City Centre and Leanyer (including Hibiscus) catchment areas
- Lyons Ward has the highest percentage of respondents that selected 'Welcoming to all people' as being important to them

## DARWIN LGA TOP 10 CARE FACTORS

RANK	ATTRIBUTE	% OF PEOPLE
#1	Cleanliness of public space	66% 
#2	Elements of the natural environment (views, vegetation, topography, water etc.)	64% 
#3	Vegetation and natural elements (street trees, planting, water etc.)	58% 
#3	General condition of vegetation, street trees and other planting	58% 
#3	Sense of safety (for all ages, genders, day/night etc.)	58% 
#6	Evidence of public events happening here (markets, street entertainers etc.)	49% 
#7	Maintenance of public spaces and street furniture	47% 
#8	Outdoor restaurant, cafe and/or bar seating	43% 
#9	Welcoming to all people	42% 
#10	Overall look and visual character of the area <sup>3</sup>	41% 

## B.2 - DEMOGRAPHIC DIFFERENCES

### YOUR COMMUNITY IS GENERALLY ALIGNED AROUND THE TOP 10 CARE FACTORS

With the exception of students (who value things to do in the evening), every demographic's top three Care Factors are within the LGA's top 10.

Across demographics and locations people generally agree on the importance of the LGA's top five Care factors.

Table 1 illustrates the top three Care Factors for each demographic, highlighting any attribute in a demographic's top three that is not in the LGA's top 10 Care Factors.

Table 2 illustrates how the LGA's top 10 Care Factor Attributes are ranked in each surveyed location, highlighting what is values more or less in each area.

TABLE 1: DEMOGRAPHIC BREAKDOWN

- Less valued than LGA average
- More valued than LGA average
- Not in a town centre's top 10

Notes: <sup>1</sup>Equal #10 with 'Walking, cycling or public transport options' when rounded-up. However, 0.6% more respondents selected 'Overall look and visual character of the area'.

## B.4 - TOP 10 CARE FACTORS BY WARDS

LEGEND  
■ #1 attribute ■ #2 attribute ■ #3 attribute  
■ #1 Different from all respondents top 10 CF

THE CHAN, RICHARDSON AND WATERS WARDS VALUE ACTIVE AND PUBLIC TRANSPORT MORE THAN THE LGA AVERAGE

THE LYONS, RICHARDSON AND WATERS WARDS VALUE EVENING ACTIVITIES AND OUTDOOR ACTIVITIES MORE THAN THE OVERALL

The Chan, Richardson and Waters wards differ from the LGA average, as 'Walking, cycling or public transport options' is part of their top 10 Care Factors.

All wards agree on the importance of cleanliness and greenery. However, the Chan ward stands out as being the only ward in which more people selected vegetation and natural elements than the those that selected cleanliness of the public space.

The following tables illustrate each ward's top 10 Care Factors and how they differ from the LGA average.

OVERALL

## ABOUT THE TOWN CENTRES' CATCHMENT AREA

The following maps illustrate the catchment area of each town centre.

The data included in each catchment area is based on the answers provided by:

- Respondents residing in the town centre's suburb
- Respondents that associated with the town centre (workers, visitors, students)
- Respondents living in neighbouring suburbs, unless the suburb includes another surveyed town centre

# PART C - PX ASSESSMENTS

THE PX SCORE IS A NUMBER BETWEEN ZERO AND 100 THAT MEASURES YOUR COMMUNITY'S LIVED PLACE EXPERIENCE. IT ALLOWS YOU TO IDENTIFY WHAT ATTRIBUTES ARE CONTRIBUTING POSITIVELY AND NEGATIVELY TO HOW YOUR STREET IS PERFORMING.

# C.1 - STREET PX ASSESSMENT

## ABOUT THE STREET PX ASSESSMENTS

A Place Experience (PX) Assessment captures your community's assessment of a place as it currently stands. Respondents undertake the observation study of a particular location onsite.

The combined inputs are used to calculate a Place Score between 1 and 100 that captures the quality of the place experience and identifies the place attributes are contributing positively or negatively to the place experience.

The PX Assessment tool is designed to track the performance of a place over time by conducting assessment before an after changes are made.

PX Scores vary between 0 and 100. Scores above 70 are very good, 50-70 there is room for significant improvement, <50 urgent investment is required.

## THE RESPONDENTS

### PX DATA

Data was collected via online and face-to-face surveys during the period of 23 of July and 15 of September 2019. A total of 449 people participated.

**n=449**

### GENDER

### AGE<sup>1</sup>

### COUNTRY OF BIRTH

Australia	63.9%
United Kingdom <sup>2</sup>	10%
New Zealand	4.7%
India	2.9%
Iran	2.2%

### 2016 CENSUS DATA

This column captures the make-up of our population in accordance with the 2016 census.

**N=78,804**

### GENDER

### AGE<sup>1</sup>

### COUNTRY OF BIRTH

Australia	57%
Philippines	4.3%
England <sup>2</sup>	3.3%
India	2.7%
New Zealand	2.0%

## HOW ARE DARWIN'S MAIN STREETS PERFORMING?

Your community identified your main streets as:

### UNEQUAL

With a high PX score of 77/100 in Casuarina Drive and a low PX Score of 54/100 Kalymnos Drive, there is a gap in people's place experience across the LGA.

### STANDING OUT

Both 'Overall look and visual character of the area' and 'Point of difference from other similar streets or places' are amongst the top performing attributes for the Darwin LGA.

### FRIENDLY

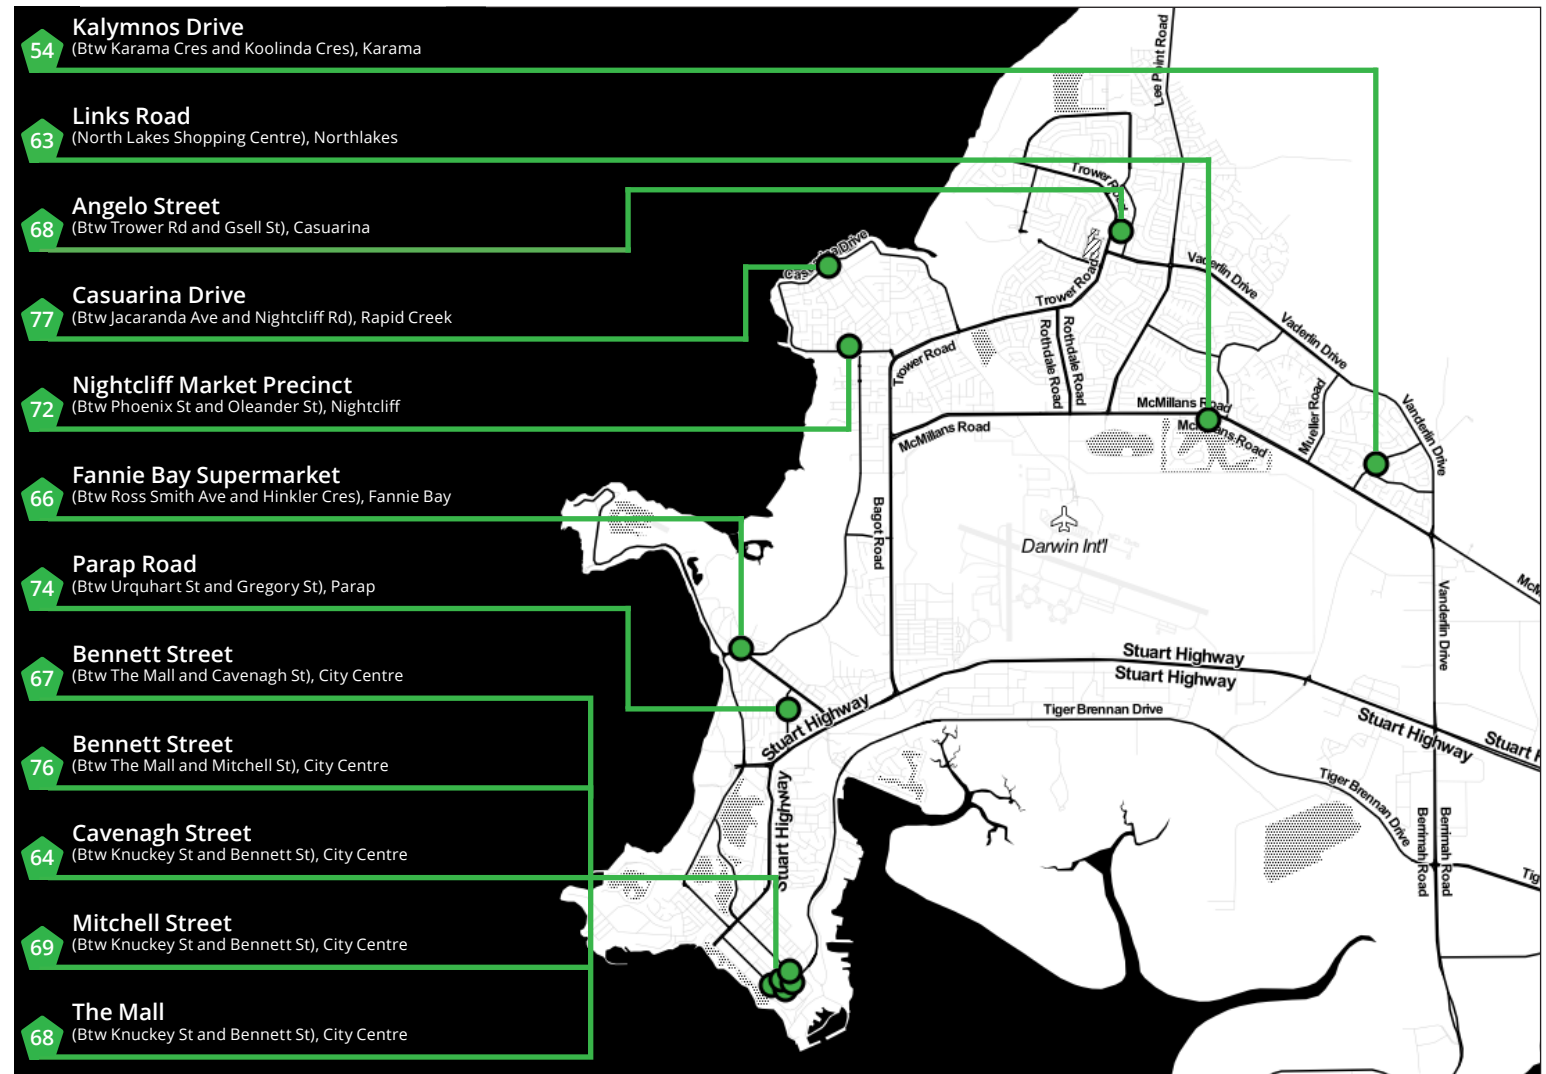

One of your LGA's strongest performing attribute is 'Welcoming to all people'.

### POORLY MAINTAINED

The 'Maintenance of public spaces and street furniture' is amongst the LGA's worst performing place attributes.

### NOT OFFERING A UNIQUE BUILT ENVIRONMENT OR CONNECTION TO LOCAL HISTORY

Both 'Unusual or unique buildings or public space design' and 'Local history, heritage buildings or features' are amongst your LGA's worst performing place attributes.

## C.2 - COMPARISON WITH THE NATIONAL BENCHMARK

### DARWIN'S AVERAGE IS PERFORMING ABOVE THE NATIONAL BENCHMARK

Your PX Scores acts as a benchmark to track liveability performance over time and allows for comparison against other locations. The combined PX results of surveyed Darwin streets is here compared to a other states across Australia.

#### PX Scores:

**70** Victorian Average

**68** Surveyed Darwin Streets Average

**65** National Average

**63** New South Wales Average

**59** Western Australian Average

**56** Queensland Average

YOUR TOP 5 ATTRIBUTES COMPARED TO THE NATIONAL AVERAGE ARE:	DIFFERENCE FROM NATIONAL AVERAGE
Things to do in the evening (shopping, dining, entertainment etc.)	<b>+16.9</b>
Evidence of public events happening here (markets, street entertainers etc.)	<b>+15.2</b>
Point of difference from other similar streets of places	<b>+14.8</b>
Free and comfortable group seating	<b>+14.4</b>
Car accessibility and parking	<b>+12.3</b>

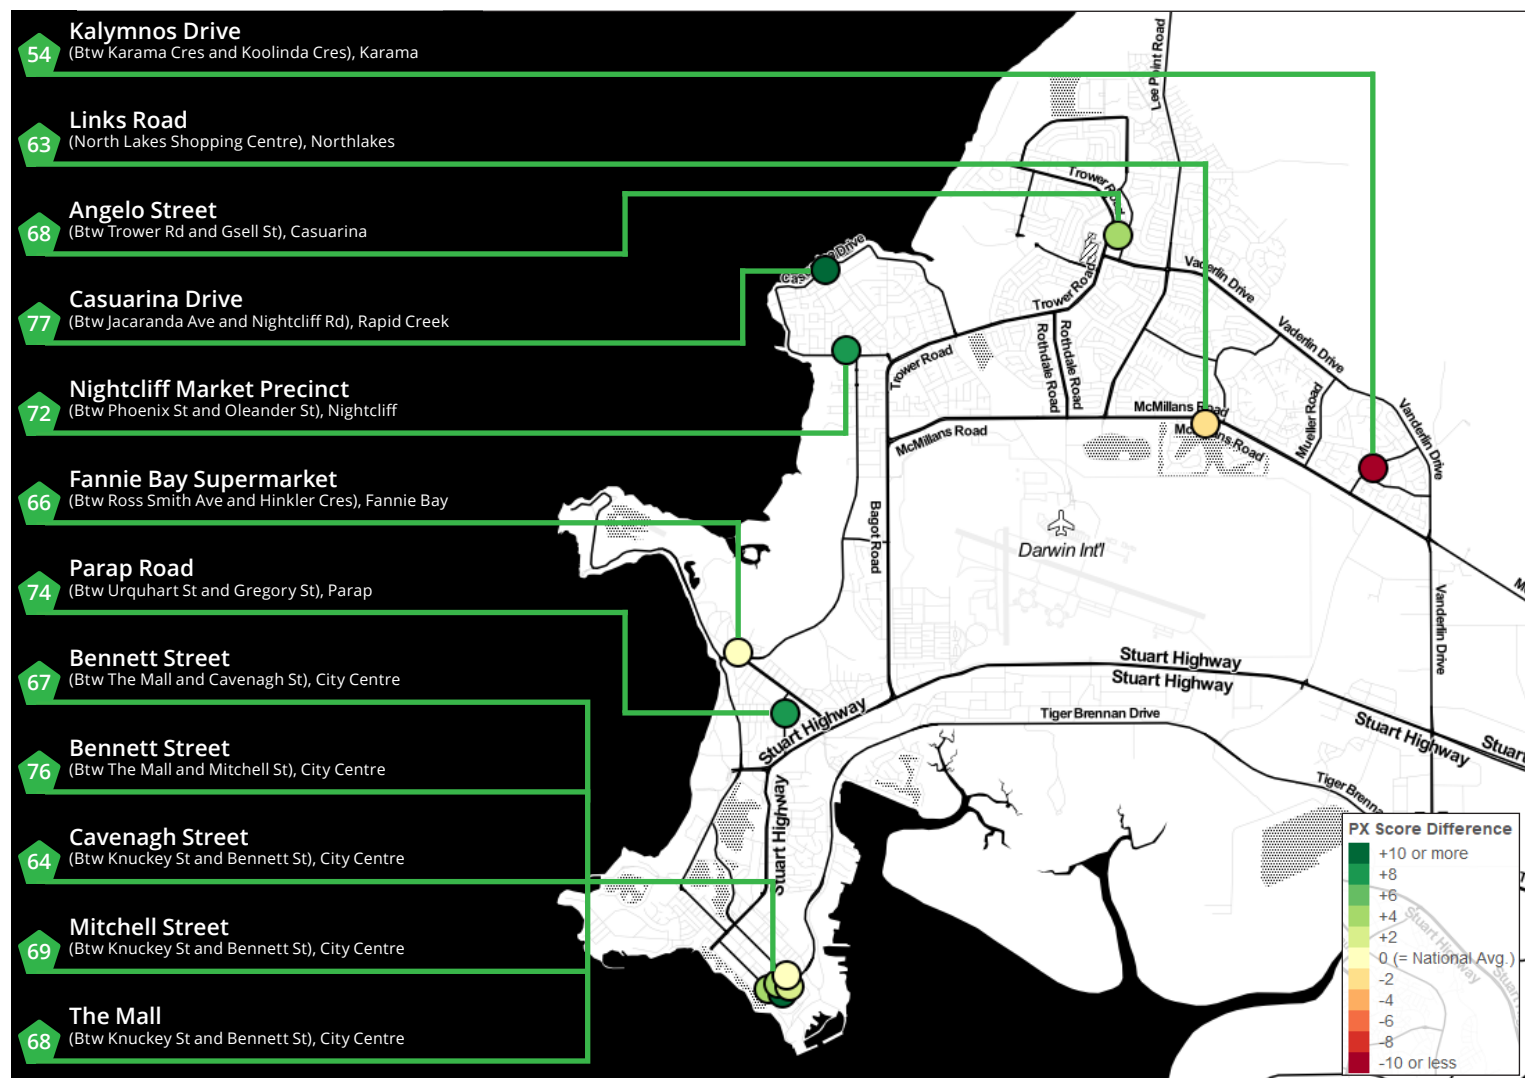

YOUR BOTTOM 5 ATTRIBUTES COMPARED TO THE NATIONAL AVERAGE ARE:	DIFFERENCE FROM NATIONAL AVERAGE
Culturally diverse businesses (range of ethnicities and interests etc.)	<b>-9.3</b>
Businesses that reflect the local community and values	<b>-7.0</b>
Interaction with locals/ other people in the area (smiles, customer service etc.)	<b>-6.9</b>
Maintenance of public spaces and street furniture	<b>-6.8</b>
Cleanliness of public space	<b>-5.4</b>

## NOT ALL MAIN STREETS ARE PERFORMING ABOVE THE NATIONAL AVERAGE

While the Darwin LGA average is performing better than the national average, the same cannot be said of all its main streets.

The following map highlights the difference in performance of each assessed street compared to Place Score's national benchmark.

**Notes:** Follow [this link](#) to see how all 50 Place Score attributes are performing compared to the national average. The grey area illustrates attributes that are within the margin of error, meaning you should be cautious as they could be a bit lower, higher or the same as the national average. National average sample used n=11210 (Oct 2019) PX Scores vary between 0 and 100. Scores above 70 are very good, 50-70 there is room for significant improvement, <50 urgent investment required.

## C.3 - MAIN STREETS PERFORMANCE COMPARISON

CASUARINA DRIVE IS THE BEST PERFORMING MAIN STREET WITH A PX OF 77, KALYMNOS DRIVE IS THE WORST PERFORMING MAIN STREET WITH A PX OF 54

# PRIORITIES FOR FANNIE BAY

## STRENGTHS AND PRIORITIES FOR FANNIE BAY

These tables and graph illustrate your town centre's strengths, priorities and things to consideration.

**STRENGTHS** should be celebrated and protected.

**PRIORITIES** identify the aspects of your town centres that are important to people but are currently under-performing. Improving these attributes will have the most significant impact on your community.

**CONSIDERATIONS** identify attributes to look-out for, they are negatively affecting your town centre and can become more significant issues if more people start caring about them.

Note that the PX data collected for Fannie Bay Market is below the usual targets for an optimal confidence level, these results should be used with caution.

Data was collected over both week and weekend. However, in both instances users of the place were reluctant to stop and undertake a PX Assessment.

### LEGEND

-- Vertical: Top 10 CF threshold

Diagonal: Threshold showing attributes which PX rating is performing 10 pts worse than their CF ranking<sup>1</sup> (PX=CF+10)

..... Equal CF rank and PX Score (PX=CF)

Strength (Protect and build upon these attributes)

Priority (Focus on improving these attributes)

Consideration (Focus on improving these attributes AFTER all priorities have been addressed)

CF	STRENGTH
10	Overall look and visual character of the area
7	Evidence of public events happening here (markets, street entertainers etc.)
2	Elements of the natural environment (views, vegetation, topography, water etc.)

CF	PRIORITY
9	Maintenance of public spaces and street furniture
1	Cleanliness of public space
5a	Walking, cycling or public transport options
4	General condition of vegetation, street trees and other planting
8	Outdoor restaurant, cafe and/or bar seating
3	Vegetation and natural elements (street trees, planting, water etc.)
5b	Sense of safety (for all ages, genders, day/night etc.)

CF	CONSIDERATION
11	Local history, heritage buildings or features
14	Public art, community art, water or light feature
20	Evidence of recent public investment (new planting, paving, street furniture etc.)

**Notes:** <sup>1</sup> PX data sample for Fannie Bay has a standard error ±8.3pts. CF - Care Factor ranking out of 50 - the lower the number the higher the number of people who think this attribute is important. Strengths have a high CF and high PX. Priorities are the poorest performing CF ranked in the overall top 10. For Consideration are the worst performing overall outside of the Top 10 CF. A threshold difference of 10 pts between the CF rank and PX rating is used to assure that displayed priorities are not within the margin of error.
