Expression of Interest (EOI)
Delivery of Waste & Recycling Education Sessions

11 February 2026

City of Darwin is seeking Expressions of Interest from local individuals or organisations to be engaged to deliver waste and recycling education sessions to Darwin Primary Schools in 2026.

Objective: As part of our Waste & Resource Recovery Strategy, City of Darwin is committed to reducing waste going to landfill by 50 per cent and growing a circular economy in Darwin by 2030. Community education is key to achieving these goals. The aim of these waste & recycling education sessions is to provide Darwin school students the opportunity to learn about waste, recycling and what they can do to support a circular economy in Darwin.

Scope: The successful applicant/s will be engaged on an hourly basis to deliver waste and recycling education sessions to Darwin schools upon request. Sessions are one hour in duration, and we expect to receive requests for approximately 12-30 sessions per year. Sessions will be delivered at either the Shoal Bay Education Centre or as an incursion. Bookings will be during school hours at a time agreed with the school, but scheduling is otherwise flexible.

City of Darwin has developed the content to be delivered, with a focus on Shoal Bay Waste Management Facility, recycling at home, the impacts of waste and the importance of diverting waste from landfill. There is further opportunity for applicants to tailor the education package to maximise student engagement.

Selection criteria: Applicants with experience in delivering education sessions, knowledge of best practice waste management and recycling, and a passion for both, are encouraged to apply. A valid Working with Children Clearance (Ochre Card) is also required.

Submissions: Applications are due by <u>Friday 6th March</u> via email to environment@darwin.nt.gov.au.

Applications should include your contact details, schedule of rates, availability and relevant prior experience/works.
