

APPLICATION FOR ASBESTOS/ ENGINEERED STONE DISPOSAL

IMPORTANT:

This form is for assessment of asbestos containing material, asbestos containing soil or engineered stone as required under the Environment Protection Licence for Shoal Bay Waste Management Facility.

These materials must not be brought to Shoal Bay Waste Management Facility until this form is submitted, and written approval is provided.

All materials will be inspected at the weighbridge for compliance with the assessment and approval. The approved waste material must not be mixed with other wastes.

SECTION 1: WASTE GENERATOR AND DECLARATION

Generator of waste:	
Contact name:	Email:
Phone:	Mobile:
Address of waste source:	
Type of waste (e.g. asbestos sheeting/soil/engineered stone):	
Estimated quantity (tonnes):	

Declaration:

- This waste contains only the materials declared on this form, and no other items listed in **Section 4**.*
True ☐ False ☐
- I have supplied laboratory Certificate of Analysis (CoA) - required for soil containing asbestos only.*
True ☐ N/A ☐
- Any asbestos containing material has been bagged / wrapped with heavy duty polythene bags or sheets (200mm minimum width, 0.2 mm minimum thickness) prior to transportation to prevent the release of airborne fibres.*
True ☐ False ☐

Printed name:	Date:
Signature:	

SECTION 2: TRANSPORT DETAILS

Transport company name:	
Mobile:	Email:
Date of first load disposal:	
Environment Protection Licence (EPL) number: Asbestos materials only	

Asbestos containing materials removed on a commercial or fee for service basis must be transported by a licensed transporter

Please review the information below and confirm/acknowledge by ticking the box before submitting the form to avoid processing delays:

Ensure all fields in Section 1 and Section 2 have been fully completed and signed. (incomplete forms will not be processed)	
Send completed form (pages 1,2 and 3 only) and laboratory Certificate of Analysis (for soils only) to: waste@darwin.nt.gov.au	
Disposal fees are charged as listed in the current Fees & Charges , available on our website .	
The review and outcome of this application will occur within five business days.	
Once this application is approved, all disposals must be booked in with the landfill supervisor via au.shoalbay@veolia.com with a minimum of 24 hours' notice.	

SECTION 3: DISPOSAL AUTHORISATION – CITY OF DARWIN USE ONLY

Assessed waste type:

- ☐ Asbestos (ACM)
- ☐ Asbestos – Contaminated Soil
- ☐ Engineered stone

Disposal instructions:	
Approved: <input type="checkbox"/>	Authorisation number:

I confirm that I have reviewed all sections and verified that the client/customer has fully and accurately completed this form before approval.

Authorised officer printed name:	Date:
Signature:	

SECTION 4: WASTE MANAGEMENT AND POLLUTION CONTROL (ADMINISTRATION) REGULATIONS 1998

Schedule 2 – listed wastes

- Acidic solutions or acids in solid form
- Animal effluent and residues (abattoir effluent, poultry, and fish processing waste)
- Antimony, antimony compounds
- Arsenic, arsenic compounds
- Asbestos
- Barium compounds other than barium sulphate
- Basic solutions or bases in solid form
- Beryllium, beryllium compounds
- Boron compounds
- Cadmium, cadmium compounds
- Ceramic-based fibres with physico-chemical characteristics similar to those of asbestos
- Chlorates
- Chromium compounds that are hexavalent or trivalent
- Clinical and related wastes
- Cobalt compounds
- Containers that are contaminated with residues of a listed waste.
- Copper compounds
- Cyanides (inorganic)
- Cyanides (organic)
- Encapsulated, chemically fixed, solidified or polymerised wastes.
- Ethers
- Filter cake
- Fire debris and fire wash waters
- Fly ash
- Grease trap waste
- Halogenated organic solvents
- Highly odorous organic chemicals (including mercaptans and acrylates)
- Inorganic fluorine compounds excluding calcium fluoride
- Inorganic sulphides
- Isocyanate compounds
- Lead, lead compounds
- Mercury, mercury compounds
- Metal carbonyls
- Nickel compounds
- Non-toxic salts
- Organic phosphorus compounds
- Organic solvents excluding halogenated solvents
- Organohalogen compounds that are not otherwise specified in this Schedule
- Perchlorates
- Phenols, phenol compounds including chlorophenols
- Phosphorus compounds other than mineral phosphates
- Polychlorinated dibenzo-furan (any congener)
- Polychlorinated dibenzo-p-dioxin (any congener)
- Residue from industrial waste treatment or disposal operations

- Selenium, selenium compounds
- Sewage sludge and residues including nightsoil and septic tank sludge
- Soils contaminated with a listed waste
- Surface active agents (surfactants) that contain principally organic constituents and that may contain metals and inorganic materials
- Tannery wastes (including leather dust, ash, sludges, and flours)
- Tellurium, tellurium compounds
- Thallium, thallium compounds
- Triethylamine catalysts for setting foundry sands
- Tyres
- Vanadium compounds
- Waste chemical substances arising from research and development or teaching activities, including those substances which are not identified and/or are new and the effects of which on human health and/or the environment are not known
- Wastes containing peroxides other than hydrogen peroxide
- Waste, containing cyanides, from heat treatment and tempering operations
- Waste from the manufacture, formulation and use of wood-preserving chemicals
- Waste from the production, formulation and use of biocides and phytopharmaceuticals
- Waste from the production, formulation and use of inks, dyes, pigments, paints, lacquers, and varnish
- Waste from the production, formulation and use of organic solvents
- Waste from the production, formulation and use of photographic chemicals and processing materials
- Waste from the production, formulation and use of resins, latex, plasticisers, glues and adhesives
- Waste from the production and preparation of pharmaceutical products
- Waste mineral oils unfit for their original intended use
- Waste mixtures, or waste emulsions, of oil and water or hydrocarbon and water
- Waste pharmaceuticals, waste drugs and waste medicines
- Waste resulting from surface treatment of metals and plastics
- Waste tarry residues arising from refining, distillation and any pyrolytic treatment
- Waste substances and articles containing or contaminated with polychlorinated biphenyls (PCBs), polychlorinated naphthalene's (PCNs), polychlorinated terphenyls (PCTs) and/or polybrominated biphenyls (PBBs)
- Waste of an explosive nature not subject to the Dangerous Goods Act 1998 or the Work Health and Safety (National Uniform Legislation) Act 2011
- Wool scouring waste
- Zinc compounds
