13 OFFICERS REPORTS

13.1 Letters Sent to Development Assessment Services Under Delegated Authority for Endorsement by Council
Report No. 11TS0074  CR:fh (06/05/11) Common No. 2002650

ITEM NO: 13.1

SYNOPSIS:

Council letter sent to Development Assessment Services under Delegated Authority, for endorsement by Council (Attachment A) has been referred to Council for comment pursuant to Section 48 of the Planning Act. The following report recommends that Council endorse comments provided to the Development Consent Authority by staff.

GENERAL:

Due to Development Consent Authority deadlines, a number of development applications require endorsement prior to Council’s next scheduled Town Planning Committee Meeting.

Council endorsement is required for the attached letters sent to the DCA (Attachment A).

FINANCIAL IMPLICATIONS:

Nil.

STRATEGIC PLAN IMPLICATIONS:

The issues addressed in this Report are in accordance with the following Goals/Strategies of the Darwin City Council 2008 – 2012 as outlined in the ‘Evolving Darwin Strategic Directions: Towards 2020 and Beyond’:-

Goal 1:
1. Achieve Effective Partnerships and Engage in Collaborative Relationships.

Outcome
1.1 Improve relations with all levels of Government.

Key Strategies
1.1.4 Play a strategic role in the planning and developmental processes that impact Darwin.
1.1.5 Influence Government and developers to develop sustainable projects which reflect Darwin’s lifestyle.
1.2 Effectively engage with Community.
1.2.1 Increase involvement of the Business Community for developing solutions to local issues.

**Goal 2:**
2. Enhance Darwin’s Active, Positive and Flexible Lifestyle.

**Outcome**
2.1 Improve urban enhancement around Darwin.

**Key Strategies**
2.1.1 Manage and maintain the municipal landscaping and infrastructure to a standard that meets community needs.
2.1.4 Provide a clean and liveable municipality.

**Goal 3:**
3. Assist Individuals and the Community Stay Connected with the Darwin Region.

**Outcome**
3.1 Promote the use of public spaces.

**Key Strategies**
3.1.1 Enhance public spaces and encourage greater use by the community.
3.2 Enhance transport.
3.2.1 Review transport and parking needs systems.
3.2.4 Provide parking facilities and management systems which meet the needs of the community.

**Goal 4:**
4. Create and Maintain an Environmentally Sustainable City.

**Outcome**
4.2 Improve water conservation.

**Key Strategies**
4.2.2 Manage and maintain Council’s storm water management system.

**LEGAL IMPLICATIONS:**
This item is not considered "Confidential".

**PUBLIC RELATIONS IMPLICATIONS:**
Not Assessed.

**COMMUNITY SAFETY IMPLICATIONS:**
Not Assessed.

**DELEGATION:**
To the Chief Executive Officer to provide standard Development Permit conditions as appropriate.

**CONSULTATION:**
Through the Development Application statutory process.
PROPOSED PUBLIC CONSULTATION PROCESS:

Nil

APPROPRIATE SIGNAGE:

Not Applicable.

RECOMMENDATIONS:

A. THAT Report Number 11TS0074 CR:fh entitled Council Letters sent to Development Assessment Services under Delegated Authority, for endorsement by Council, to be received and noted.

B. THAT Council endorse the letters to the Development Consent Authority in Attachment A to Report Number 11TS0074 CR:fh.

Manager Urban Planning
Department of Lands and Planning
GPO Box 1680
DARWIN NT 0801

Dear Doug

Subject: Proposed Development Application:
Parcel Description: Lot 1393 (86) Wulagi Crescent Town of Sanderson
Proposed Development: Extensions to an existing single dwelling with a reduced side setback.

Thank you for the Development Application referred to this office 12 April 2011, concerning the above. This letter may be placed before Council’s Town Planning Committee at its next meeting. Should this letter be varied or not endorsed by Council, you will be advised accordingly.

The following issues are raised for consideration by the Authority:

i). Council supports in principle the granting of a Development Permit provided the following issues are adequately addressed:

   a) Council notes a number of variations to the Northern Territory Planning Scheme provisions in relation to Clause 7.3 – Minimum Building Setbacks for residential buildings. While Council does not necessarily support these variations, in this instance it does not object.

ii). Should the above issues be adequately addressed, Council offers the following comments:

   Council comments on issues for which it is the sole responsible authority, under the Local Government Act and associated By-Laws:-

   a). Council requests the Authority requires a schematic plan demonstrating all stormwater to be collected on the site and discharged underground to Council’s stormwater drainage system. The applicant’s plans fail to demonstrate how on-site stormwater will be collected and discharged underground to Council’s drainage network.
1. The plan shall include details of site levels and Council's stormwater drain connection point/s. The plan shall also indicate how stormwater will be collected on the site and connected underground to Council's system.

3. Council requires a stormwater drainage plan to confirm that it is technically feasible to collect stormwater on the site and dispose of it into Council’s stormwater drainage system. It is also necessary to ensure that no stormwater will sheet-flow into the road reserve or onto adjoining properties.

Should this application be approved, the following conditions pursuant to the Planning Act and Council's responsibilities under the Local Government Act are also recommended for inclusion in the Development Permit issued by the Development Consent Authority.

- Designs and specifications for landscaping of the road verges adjacent to the property shall be submitted for approval by the General Manager Infrastructure, Darwin City Council, and all approved works constructed to Council’s requirements at the applicant's expense.

- The location, design and specifications for proposed and affected crossovers shall be provided to the satisfaction of the Director Technical Services, Darwin City Council and at no cost to Council.

- Kerb crossovers and driveways to the site shall be provided and disused crossovers removed, public footpath and cycleways shall be provided, stormwater shall be collected and discharged into Council's drainage network, and reinstatement works carried out, all to the requirements and satisfaction of the Director Technical Services, Darwin City Council and at no cost to Council.

- Any easements or reserves required for the purposes stormwater drainage, roads, access or for any other purpose shall be made available free of cost to the Darwin City Council or neighbouring property owners.

In considering this application, the Development Consent Authority is requested to take into account any implications of the Disability Discrimination Act (Cth) or the Anti Discrimination Act (NT) with regard to access for the disabled.

If you require any further discussion in relation to this application please feel free to contact me on 8930 0528.

Yours faithfully

Dear Doug

Parcel Description: Lot 1410 (65) Wulagi Crescent Town of Sanderson
Proposed Development: Additions to an existing single dwelling with a reduced side setback

Thank you for the Development Application referred to this office 12 April 2011, concerning the above. This letter may be placed before Council’s Town Planning Committee at its next meeting. Should this letter be varied or not endorsed by Council, you will be advised accordingly.

The following issues are raised for consideration by the Authority:

i). Council supports in principle the granting of a Development Permit provided the following issues are adequately addressed:

   a) Council notes a number of variations to the Northern Territory Planning Scheme provisions in relation to Clause 7.3 – Minimum Building Setbacks for residential buildings. The proposed setbacks are not in keeping with the general built form of the surrounding area. Notwithstanding the existing built form, the proposed design of the new lounge area encourages good breeze penetration through the building.

ii). Should the above issues be adequately addressed, Council offers the following comments:

   Council comments on issues for which it is the sole responsible authority, under the Local Government Act and associated By-Laws:-

   a). Council requests the Authority requires a schematic plan demonstrating all stormwater to be collected on the site and discharged underground to Council’s stormwater drainage system.

   .../2
The applicant’s plans fail to demonstrate how on-site stormwater will be collected and discharged underground to Council’s drainage network.

1). The plan shall include details of site levels and Council’s stormwater drain connection point/s. The plan shall also indicate how stormwater will be collected on the site and connected underground to Council’s system.

2). Council requires a stormwater drainage plan to confirm that it is technically feasible to collect stormwater on the site and dispose of it into Council’s stormwater drainage system. It is also necessary to ensure that no stormwater will sheet-flow into the road reserve or onto adjoining properties.

Should this application be approved, the following conditions pursuant to the Planning Act and Council’s responsibilities under the Local Government Act are also recommended for inclusion in the Development Permit issued by the Development Consent Authority.

- All developments on or adjacent to any easements on site in favour of Council shall be carried out to the requirements and satisfaction of the General Manager Infrastructure, Darwin City Council.

- Designs and specifications for landscaping of the road verges adjacent to the property shall be submitted for approval by the General Manager Infrastructure, Darwin City Council, and all approved works constructed to Council’s requirements at the applicant’s expense.

- The location, design and specifications for proposed and affected crossovers shall be provided to the satisfaction of the General Manager Infrastructure, Darwin City Council and at no cost to Council.

In considering this application, the Development Consent Authority is requested to take into account any implications of the Disability Discrimination Act (Cth) or the Anti Discrimination Act (NT) with regard to access for the disabled.

Doug Lesh
Manager Urban Planning
Department of Lands and Planning
GPO Box 1680
DARWIN NT 0801

Dear Doug

**Subject:** Proposed Development Application
**Parcel Description:** Lot 4736 (18) Meigs Crescent Town of Darwin
**Proposed Development:** Garage addition to an existing single dwelling with a reduced side setback.

Thank you for the Development Application referred to this office 15 April 2011, concerning the above. This letter may be placed before Council's Town Planning Committee at its next meeting. Should this letter be varied or not endorsed by Council, you will be advised accordingly.

The following issues are raised for consideration by the Authority:

i). **Council supports in principle the granting of a Development Permit provided the following issues are adequately addressed:**

   a). Council notes a variation to the Northern Territory Planning Scheme provisions in relation to Clause 7.3 – Minimum Building Setbacks for Residential Buildings. While Council does not necessarily support these variations, in light of the existing built form, it does not object.

ii). **Should the above issues be adequately addressed, Council offers the following comments:**

   Council comments on issues for which it is the sole responsible authority, under the Local Government Act and associated By-Laws:

   b). **Council requests the Authority requires a schematic plan demonstrating all stormwater to be collected on the site and discharged underground to Council’s stormwater drainage**

   .../2
system. The applicant’s plans fail to demonstrate how on-site stormwater will be collected and discharged underground to Council’s drainage network.

1). The plan shall include details of site levels and Council’s stormwater drain connection point/s. The plan shall also indicate how stormwater will be collected on the site and connected underground to Council’s system.

2). Council requires a stormwater drainage plan to confirm that it is technically feasible to collect stormwater on the site and dispose of it into Council’s stormwater drainage system. It is also necessary to ensure that no stormwater will sheet-flow into the road reserve or onto adjoining properties.

Should this application be approved, the following conditions pursuant to the Planning Act and Council’s responsibilities under the Local Government Act are also recommended for inclusion in the Development Permit issued by the Development Consent Authority.

- All developments on or adjacent to any easements on site in favour of Council shall be carried out to the requirements and satisfaction of the General Manager Infrastructure, Darwin City Council.

In considering this application, the Development Consent Authority is requested to take into account any implications of the Disability Discrimination Act (Cth) or the Anti Discrimination Act (NT) with regard to access for the disabled.

If you require any further discussion in relation to this application please feel free to contact me on 8930 0528.

Yours faithfully

Dear Doug

Parcel Description: Lot 4992 (42) Goodman Street Town of Darwin
Proposed Development: Garage and carport additions to an existing single
dwelling with reduced side setbacks

Thank you for the Development Application referred to this office 8 April 2011,
concerning the above. This letter may be placed before Council's Town Planning
Committee at its next meeting. Should this letter be varied or not endorsed by
Council, you will be advised accordingly.

The following issues are raised for consideration by the Authority:

i). Council supports in principle the granting of a Development Permit
provided the following issues are adequately addressed:

Council comments on issues for which it is the sole responsible authority, under
the Local Government Act and associated By-Laws:-

a). Council requests the Authority requires a schematic plan
demonstrating all stormwater to be collected on the site and
discharged underground to Council's stormwater drainage
system. The applicant's plans fail to demonstrate how on-site
stormwater will be collected and discharged underground to
Council's drainage network.

1). The plan shall include details of site levels and Council's
stormwater drain connection point/s. The plan shall also
indicate how stormwater will be collected on the site and
connected underground to Council's system.

.../2
2). Council requires a stormwater drainage plan to confirm that it is technically feasible to collect stormwater on the site and dispose of it into Council’s stormwater drainage system. It is also necessary to ensure that no stormwater will sheet-flow into the road reserve or onto adjoining properties.

Should this application be approved, the following conditions pursuant to the Planning Act and Council’s responsibilities under the Local Government Act are also recommended for inclusion in the Development Permit issued by the Development Consent Authority.

- Designs and specifications for landscaping of the road verges adjacent to the property shall be submitted for approval by the General Manager Infrastructure, Darwin City Council, and all approved works constructed to Council’s requirements at the applicant’s expense.

- The location, design and specifications for proposed and affected crossovers shall be provided to the satisfaction of the General Manager Infrastructure, Darwin City Council and at no cost to Council.

- All developments on or adjacent to any easements on site in favour of Council shall be carried out to the requirements and satisfaction of the General Manager Infrastructure, Darwin City Council.

In considering this application, the Development Consent Authority is requested to take into account any implications of the Disability Discrimination Act (Cth) or the Anti Discrimination Act (NT) with regard to access for the disabled.

If you require any further discussion in relation to this application please feel free to contact me on 8930 0528.

Dear Doug

Proposed Development Application: PA2011/0226
Parcel Description: Lot 5574 (18) Dorrigo Crescent Town of Sanderson
Proposed Development: Dependant Unit to an existing single dwelling and shed with a reduced side setback

Thank you for the Development Application referred to this office 6 April 2011, concerning the above. This letter may be placed before Council’s Town Planning Committee at its next meeting. Should this letter be varied or not endorsed by Council, you will be advised accordingly.

The following issues are raised for consideration by the Authority:

i). Council supports in principle the granting of a Development Permit provided the following issues are adequately addressed:

   a) It is noted that the proposed dependant unit appears to be fully self contained and approximately double the floor area stipulated under clause 7.10.4 (2)(a) of the NT Planning Scheme.

   b) It is also noted that the building setbacks are not in compliance with the NT Planning Scheme, the impact of the variance is not considered to be detrimental to the amenity of the locality.

ii). Should the above issues be adequately addressed, Council offers the following comments:

   Council comments on issues for which it is the sole responsible authority, under the Local Government Act and associated By-Laws:-
a). Council requests the Authority requires a schematic plan demonstrating all stormwater to be collected on the site and discharged underground to Council’s stormwater drainage system. The applicant’s plans fail to demonstrate how on-site stormwater will be collected and discharged underground to Council’s drainage network.

1). The plan shall include details of site levels and Council’s stormwater drain connection point/s. The plan shall also indicate how stormwater will be collected on the site and connected underground to Council’s system.

2). Council requires a stormwater drainage plan to confirm that it is technically feasible to collect stormwater on the site and dispose of it into Council’s stormwater drainage system. It is also necessary to ensure that no stormwater will sheet-flow into the road reserve or onto adjoining properties.

Should this application be approved, the following conditions pursuant to the Planning Act and Council’s responsibilities under the Local Government Act are also recommended for inclusion in the Development Permit issued by the Development Consent Authority.

- Designs and specifications for landscaping of the road verges adjacent to the property shall be submitted for approval by the General Manager Infrastructure, Darwin City Council, and all approved works constructed to Council’s requirements at the applicant’s expense.

- The location, design and specifications for proposed and affected crossovers shall be provided to the satisfaction of the General Manager Infrastructure, Darwin City Council and at no cost to Council.

- All developments on or adjacent to any easements on site in favour of Council shall be carried out to the requirements and satisfaction of the Director Technical Services, Darwin City Council.

In considering this application, the Development Consent Authority is requested to take into account any implications of the Disability Discrimination Act (Cth) or the Anti Discrimination Act (NT) with regard to access for the disabled.

If you require any further discussion in relation to this application please feel free to contact me on 8930 0528.

Yours faithfully

20 April 2011

Doug Lesh
Manager Urban Planning
Department of Lands and Planning
GPO Box 1680
DARWIN NT 0801

Dear Doug

Parcel Description: Section 5309 (9) Downes Street and Section 5310 (12) Catterthun Street Hundred of Bagot.

Proposed Development: Offices in a 2 storey building exceeding 8.5m in height plus basement car parking.

Thank you for the Development Application referred to this office 6 April 2011, concerning the above. This letter may be placed before Council’s Town Planning Committee at its next meeting. Should this letter be varied or not endorsed by Council, you will be advised accordingly.

The following issues are raised for consideration by the Authority:

i). Council supports in principle the granting of a Development Permit provided the following issues are adequately addressed:

a). Council notes that the proposed development exceeds the required 8m height limit under clause 6.1 Height Control for the General Industry Zone (GI). At its highest point the roof is 9.63m above natural ground level to the central roof ridges.

Notwithstanding the 1.63m variation to clause 6.1 Height Control, Council does not object to the proposal as it does not appear to adversely affect the character of the Winnellie Light Industrial Precinct, the existing visual amenity or disrupt natural airflow.

b). Council notes that the development proposal is across Lots 5309 and 5310 which have not been consolidated. An access easement will be required if the lots are to remain unconsolidated.

ii). Should the above issues be adequately addressed, Council offers the following comments:

.../2
Council comments on issues for which it is the sole responsible authority, under the Local Government Act and associated By-Laws:-

a). Council requests the Authority requires a schematic plan demonstrating all stormwater to be collected on the site and discharged underground to Council's stormwater drainage system. The applicant's plans fail to demonstrate how on-site stormwater will be collected and discharged underground to Council's drainage network.

1). The plan shall include details of site levels and Council's stormwater drain connection point/s. The plan shall also indicate how stormwater will be collected on the site and connected underground to Council's system.

2). Council requires a stormwater drainage plan to confirm that it is technically feasible to collect stormwater on the site and dispose of it into Council's stormwater drainage system. It is also necessary to ensure that no stormwater will sheet-flow into the road reserve or onto adjoining properties.

b) Council requests the authority require a Waste Management Plan demonstrating waste disposal, storage and removal in accordance with Council's Waste Management Policy 054. The applicant's plans fail to demonstrate adequate waste management.

A copy of Council's Waste Management Policy 054 is may be viewed on Council's website or by contacting Council's Infrastructure department.

Should this application be approved, the following conditions pursuant to the Planning Act and Council's responsibilities under the Local Government Act are also recommended for inclusion in the Development Permit issued by the Development Consent Authority.

- Designs and specifications for landscaping of the road verges adjacent to the property shall be submitted for approval by the General Manager Infrastructure, Darwin City Council, and all approved works constructed to Council's requirements at the applicant's expense.

- The location, design and specifications for proposed and affected crossovers shall be provided to the satisfaction of the Director Technical Services, Darwin City Council and at no cost to Council.

- Kerb crossovers and driveways to the site shall be provided and disused crossovers removed, public footpath and cycleways shall be provided, stormwater shall be collected and discharged into Council's drainage network, and reinstatement works carried out, all to the requirements and satisfaction of the Director Technical Services, Darwin City Council and at no cost to Council.
• Sight lines shall be provided at crossovers to public streets to the satisfaction of the Director Technical Services, Darwin City Council. No fence or tree exceeding 0.6 metres in height shall be planted in front of the sight line.

• Any gate over an access to a public road shall be placed on the subject site at least 4.5m from the face of the kerb line of the adjoining public road.

• Car parking spaces and internal driveways shall meet the requirements of the relevant Australian Standard and be linemarked and sealed with an impervious material.

• The total number of required disabled car parking bays shall be met on site.

• Pursuant to clause 6.5.2 of the Northern Territory Planning Scheme and s.70(5) of the Planning Act a monetary contribution shall be paid to Darwin City Council for any determined parking shortfall.

• All developments on or adjacent to any easements on site in favour of Council shall be carried out to the requirements and satisfaction of the Director Technical Services, Darwin City Council.

• Waste bin storage and pick up shall be provided in accordance with Council’s Waste Bin Policy.

• Further subject to conditions of subdivision to the satisfaction of service authorities.

In considering this application, the Development Consent Authority is requested to take into account any implications of the Disability Discrimination Act (Cth) or the Anti Discrimination Act (NT) with regard to access for the disabled.

If you require any further discussion in relation to this application please feel free to contact me on 8030 0528.

Yours faithfully

13 OFFICERS REPORTS

13.2 Greater Darwin Region Land Use Plan – Towards 2030 – Consultation Paper
Report No. 11TS0077 CR:fh (10/05/11) Common No. 1878045

ITEM NO: 13.2

SYNOPSIS:

The Northern Territory Government has released the consultation paper Greater Darwin Region Land Use Plan – Towards 2030 for public comment. The document provides a framework for future land uses within the Greater Darwin Region, including the geographical areas of Darwin City Council, Palmerston City Council, Litchfield Shire and areas within the Cox Peninsular.

A draft of Council’s submission on the Land Use Plan was presented to Council’s Town Planning Committee Meeting on 4 May 2011 and it was resolved:

**Discussion on The Greater Darwin Region Land Use Plan - Towards 2030 - Consultation Paper**

*Report No. 11TS0062 CR: FH (08/04/11) Common No. 1530835*

**THAT** the Committee resolve under delegated authority:-

A. THAT Report Number 11TS0062 CR:fh entitled, Discussion On The Greater Darwin Region Land Use Plan - Towards 2030 - Consultation Paper, be received and noted.

B. THAT further consideration of Council’s response be made at the Council Meeting on Tuesday, 17 May 2011.

**DECISION NO.20\3916 (04/05/11)**

The following amended report and response (Attachment B) incorporates feedback provided on the Greater Darwin Region Land Use Plan to the Northern Territory Government.
GENERAL:

The consultation paper is out for comment until 13 May 2011. At a Capital City Committee Special Planning workshop on 9 May 2011, Council requested an extension until 19 May 2011. The Chief Minister agreed to extend the closing date until 31 May 2011.

The Northern Territory and in particular the Darwin Region, has been experiencing rapid population growth in recent years, which the government expects will continue to grow both economically and physically in the foreseeable future. Strong growth or not, it is important to plan for Darwin’s future.

The Greater Darwin Region Land Use Plan – Towards 2030 (‘The Land Use Plan’) is the proposed framework plan to guide growth in the region. The Land Use Plan anticipates a population growth of between 53,000 to 70,000 people living in the Darwin Greater Region by 2025.

Along with population growth comes the need for housing, employment, retail, social infrastructure and recreational areas. In order to address this growth, the Plan identifies the need for an additional 21,000 – 28,060 additional dwellings (based on a household size of 2.57 people per dwelling), 125,000sqm of retail, 76,000sqm for bulky goods retail, 90,000sqm commercial and 1,215ha for various industrial uses.

The Land Use Plan then further breaks down the expected land uses into municipal areas and more specific development areas. The Land Use Plan in general, identifies a 50/50 split of Greenfield and infill development for the region. Due to the level of existing development and limited Greenfield opportunities, within the Darwin municipality the ratio of infill to Greenfield site development is much higher, with the Land Use Plan anticipating a rate of approximately 72.5% infill residential development to 27.5% Greenfield development. The Plan identifies that approximately 11,232, or 41.5% of all additional dwellings will be located with the Darwin.

Relationship to other documents:

Coalition of Australian Governments (COAG) has identified a set of criteria that all capital city strategic planning systems should address, Attachment A. A brief assessment of the Land Use Plan against the COAG criteria shows that the Land Use Plan is just one small component of the overall strategic planning required to adequately plan for Darwin’s future and need to address all the COAG criteria. Put simplistically, this Land Use Plan should be seen as a starting point for further detailed strategic planning work which will be required to adequately address planning for Darwin’s future.

Territory 2030 Strategic Plan identifies as an immediate focus, the need for a balanced housing market and the need to prepare a land strategy that includes appropriate planning and land release. The Land Use Plan is a direct response to the Territory 2030 objectives.
The Northern Territory Government has produced previous land use plans. The Land Use Plan currently out for consultation, if adopted, will supersede previous versions of the Darwin Regional Land Use Plan.

Linkages to Darwin’s Evolving Darwin Strategic Plan are identified in the body of this report.

Council Issues:

General comments:

Darwin as a Capital City is the population and economic hub of the Northern Territory. Major cities drive the Australian economy generating 80 percent of our GDP and housing nearly 75 percent of Australia’s workforce. Priority road and rail linkages, airports and ports are required to support Darwin’s productivity.

The capacity for Darwin to manage change and accommodate growth will determine the quality of life and economic prosperity of all Territorians. Coordination and planning across all levels of government must drive better integrated land use, settlement, and infrastructure and climate adaption. The Land Use Plan should seek to stimulate Darwin’s population growth to attract and retain a skilled workforce. In doing so we must ensure Darwin remains an attractive and affordable place to live. The provision of sustainable physical and social infrastructure needs to be a priority as part of any Land Use Plan.

Darwin City Council recognises the need for all three levels of government to work together, and with the community to ensure our municipality and the surrounding areas are managed sustainably for the future and well being of the community.

Local government provides the most accessible level of government and holds unique knowledge about local community needs and is responsible for community assets worth billions of dollars.

Darwin City Council’s key concerns regarding the Greater Darwin Region Land Use Plan Towards 2030 Consultation Paper, are summarised as follows:

- the process and inadequacy of early genuine engagement and consultation with local government;
- the lack of detail within the Plan relating to the underpinning plans, strategies and policies described in the Plan which are considered essential in order to deliver on the outcomes (eg. Transport and Infrastructure Strategies)
- the lack of evidence to support predicted population growth and sustainability;
uncertainty of funding and timing of key infrastructure to support the population growth; and

the lack of detail within the Plan surrounding the further development and importance of Darwin as the Capital City and the broader region as the economic and business centre of the Territory.

Darwin City Council submits that the Territory and local Governments must ideally align themselves to ensure that the desired outcomes of the Land Use Plan are delivered.

Darwin City Council seeks access to the research that underpins the Land Use Plan to better understand and provide a fully informed response to the Plan in areas such as but not limited to the following:

- Demographic projections;
- Economic, employment, infrastructure, transport, social & cultural, environment plans relevant to the Darwin Region that have been used to develop and/or support the Land Use Plan;
- Climate change, rising sea level and updated storm surge plans;
- Infill modelling;
- Timing and estimates associated with head works and infrastructure works;
- Costing models for Palmerston, Weddell, and parts of Litchfield; and
- Demand for commercial land – have exact sites been identified.

**Partnering with Local Government**

The section on *Partnering with local government* (p66) is brief and appears to underestimate the significant role that Councils will play in managing growth and providing key forms of infrastructure and services.

Darwin City Council considers that there has not been an early genuine engagement and consultation with local government in the development of the Plan.

Rather than having a limited opportunity to critique the document prepared by the Northern Territory Government, Darwin City Council is of the view that local government should be included as a stakeholder in the formation of this and similar documents.

In reflecting on the Council of Australia Governments (COAG) criteria contained in **Attachment A** we note that Criteria 9 identifies the request for co-ordination with local government (as one of the three levels of government).
Without close coordination and the support from Councils, many of the Land Use Plan’s key goals will be much harder to achieve. For example, without a supportive Council service delivery framework the Land Use Plan’s desired network of multi-purpose activity hubs may be little more than shopping centres.

Another example could be the need to improve Council stormwater drainage and road infrastructure in order to maximise infill yields in key precincts. To achieve this Council will need to work with other service authorities and the Northern Territory Government to develop contribution plans for future upgrades.

The opportunity exists for Council and the Northern Territory Government to work positively together in meeting the goals of the Land Use Plan. To achieve this a clear structure of roles, responsibilities, communication and coordination between the Northern Territory Government and the affected Councils will be required to support implementation of the Land Use Plan. The Plan should be clear about the expected roles of Council, how the Northern Territory Government will support these roles, and what measures will be set in place to monitor and coordinate joint delivery actions.

Without a clear governance framework, it will be difficult to coordinate joint implementation, share resources and develop a common understanding on the key issues and responses.

**Sustainability**

Sustainability is stated as a core focus of the Land Use Plan. However, there is very little detail as to how the Plan actually promotes sustainability beyond advocating for a more compact city through infill development. To achieve its sustainability goals, the Land Use Plan is reliant upon integration with numerous other strategies, such as transport and infrastructure strategies which have not yet been developed.

The Land Use Plan is designed to provide a framework for delivering the Territory 2030 targets. However, these will need to be underpinned by a more detailed set of policies and actions which can be implemented. It is difficult to fully understand the implications of the Land Use Plan without the detail for delivery. An integrated Regional Strategic Plan is required to ensure that social, economic and environmental goals align with infrastructure, transport, employment and housing provision.

**Growth**

The Plan nominates eight key growth areas. Careful examination is required to determine if growth in these precincts is likely to be achieved, having regard to market preferences (where and how people want to live) and the economics of development (infrastructure costs, capital to site value analysis).

Much of the new (Greenfield) growth nominated in the Land Use Plan is focussed on the proposed City of Weddell. This is a relatively remote location, the success of which is highly dependent upon the provision of employment, human services and
integrated transport solutions, none of which are detailed in the Land Use Plan and therefore unable to be assessed.

The application of low, medium and high growth scenarios, as shown in the Land Use Plan is unclear. One interpretation is, for example, that Weddell only occurs under a high growth scenario. It is also unclear if the Plan makes any allowance for the uncertainty in land supply. The evidence in some other Australian capital cities shows that approximately 30% of land within identified growth areas never gets zoned. Furthermore, land earmarked for residential growth can also be taken up by schools and other infrastructure, thereby reducing anticipated yields. Allowances are required to avoid under supply and upward pressure on prices.

Identifying a specific additional dwelling target is recommended, as is the intent to accommodate infill development to assist in achieving the targets. However, it is important to recognise that infill development does not occur automatically and that yields from infill development can be difficult to achieve. To this end, targets actually need to be set above the theoretical capacity. Much depends on market choice and preference, community resistance, together with affordability considerations.

There is a clear intent to consolidate existing urban growth. The means of achieving such, are limited to targeted infill redevelopment opportunities. A further approach may be to encourage higher density developments at the fringe, within master planned communities, which will also slow the rate of urban expansion.

**Housing**

It is noted that the dwelling targets within the Land Use Plan include the period 2006-2010. For Darwin City the target for this period was 1,020 dwellings, yet the Land Use Plan suggests that approximately 2,000 dwellings were approved during this period. It appears that the Central Business District (CBD) is already ahead of target. Adjustments to the dwelling targets/capacities should ideally be made ahead of formal adoption of the Land Use Plan.

When considering how to increase the density of a city, there are a number of methods that can be employed. In order to achieve a higher density within existing urban areas there will be an inevitable transition from the established urban form, to that of a more compact arrangement, through a process referred to as ‘urban infill’.

To have an understanding of what outcomes are possible for an area, there are a number of considerations to be made. Developing a strategic plan for an area, is to have a goal and method of achieving that goal, whether that be at a fine grained lot by lot basis or a broader neighbourhood level.

There is a considerable amount of research and investigation that must take place to have a full understanding of the likely population growth, capacity of both the land and existing services and infrastructure, before a maximum potential can be determined. Once this understanding has been achieved, the decision then turns to what is desired within the area?
The recognition of the need to expand housing choices is supported, with a greater focus required on temporary accommodation, retirement living and affordable housing. Design guidance is required outside of the Land Use Plan to facilitate appropriate development outcomes.

The Land Use Plan allocates 15% of all new residential land to affordable and social housing needs. A suitable housing strategy or guidelines will be required to ensure that substandard housing is avoided and adequate social infrastructure is provided to support lower income households.

The Land Use Plan also notes the creation of an Affordable Housing Company to develop and manage affordable housing in the Darwin Region. There are a number of good examples in Australian Cities, including the Brisbane Housing Company, which builds and manages a range of quality affordable housing.

A key matter for resolution is, should housing be further encouraged within existing neighbourhood activity centres, in order to activate and promote use of the centres?

**Transport and Infrastructure**

Identifying key infrastructure as part of the Land Use Plan is supported (eg. rapid transit corridor, proposed ferry route and terminal). However, it is important that the timing and funding arrangements be determined to ensure implementation occurs ahead or as part of key future developments (ie Weddell).

The Land Use Plan includes a future rapid transport corridor, which needs to become a priority once feasible, to support the focus on sustainability.

**Strategic Direction 06**, states that a series of strategies will be developed to improve integration of land use planning, transport and infrastructure planning. This is important to support future growth in a sustainable manner and the development of these strategies in line with the Land Use Plan is considered critical.

Reference is made in the Land Use Plan to ‘interconnected urban and rural communities’. How this is to be promoted / achieved through transport (ie motor vehicle / pedestrian / cycling / public transit) is unclear and requires specific policies/actions to be developed as a priority.

Whilst intensification along transport corridors is supported, are such locations sufficiently amenable to attract new housing investment? What work/investment needs to occur to make such locations attractive for the market to respond? Answers to these key questions should be provided to further consider this principle.

It is important that service provision be matched to growth in rural villages. Whilst rural villages may have capacity for growth, will the market take up the opportunities, given their remote location? It should be asked if opportunities are not taken up, where will the pressure and demand for housing be felt?
Retail and Commercial

The creation of a hierarchy of future activity centre nodes is supported, providing they are of a scale and form which acts more than just a retail hub for the surrounding communities. Further detailed policies/actions are required to guide suitable development.

Planning for retail development and activity centres is critical to support sustainable and walkable communities. To this end, the identification of future neighbourhood centres is supported.

Employment and Industry

Ensuring the identification and provision of zoned and serviced land for industrial development and growth is essential to underpinning the overall growth of Darwin. The Land Use Plan identifies future strategic land. However, it is important that a rolling supply of zoned and serviced land be maintained.

The Land Use Plan makes specific reference to industrial land use. An alternate approach is to broaden this to include ‘employment lands’ where major economic and job creation activity can occur, in addition to more traditional industrial uses.

Council Specific Issues:

The Land Use Plan appropriately reinforces the primacy of Darwin as the Region’s administration, tourism and retail centre. However Darwin should also be recognised for its central role in accommodating housing and population as well as being the cultural and recreational hub of the Territory. This is particularly relevant, given that Darwin City Council controlled areas are earmarked to accommodate 40 percent of future residential growth in the region.

In accommodating the bulk of new dwelling growth, it will be important for Darwin to obtain its share of physical and social infrastructure to appropriately manage the additional population.

To succeed, urban infill requires a strong focus on place making/urban design to make places attractive and amenable and to assist in encouraging development. Developments need to include adequate setbacks and permeable vegetated open spaces in order to avoid the creation of heat islands that increase the temperature of our liveable space. Darwin City Council, along with other agencies, will play a key role in respect to facilitating such outcomes.

Identifying suitable areas for future urban infill and the level of development appropriate, should include consideration of factors such as:
Accessibility to services and public infrastructure:

- Public Transport
- Schools
- Recreation (social gathering places, active spaces, local parks)
- Medical Facilities
- Shops
- Employment
- Road networks
- Essential infrastructure capacity for sewer, water, power, stormwater

Urban form:

- Streetscape
- Suburb layout
- Scale of development
- Useable open space
- Mix of housing options
- Climate Change

Darwin City Council considers that significant body of work is required in order to fully understand the affects, both positive and negative, and community support relating to various infill models in order to allow informed community discussion and debate.

**Darwin – Inner Suburbs** are targeted for growth via infill/densification (eg. dual occupancy on 1200sqm allotments). Such a strategy has the potential to change the established character of suburbs and to succeed, needs to be supported by design guidelines which demonstrate best practise in urban infill. If early redevelopment examples have poor outcomes then there is potential for the community to resist further infill. Design and amenity will be the key, with amendments to the NT Planning Scheme critical to avoiding unacceptable impacts on surrounding properties.

**Darwin – Northern Suburbs** are targeted as a growth area, particularly adjacent to the Casuarina Shopping Centre. The encouragement of high densities adjacent to activity centres is important. However, it is equally important to recognise that activity centres should provide more than just a retail experience. Structure Planning and Policy Planning need to occur, which facilitates development/redevelopment whereby centres become a community destination and focus for recreation and entertainment with spaces designed to attract visitation. Centres should be designed to address and integrate with the surrounding community to promote visitation over a longer period (i.e. throughout the day and evening).

More than 40 percent of additional new dwellings in the region are expected to be accommodated within the Darwin City Council controlled area, within either the Darwin CBD, the development of strategic sites or infill within the Municipality. Whilst not the role of the Land Use Plan, detailed policies (developed in conjunction with
the Darwin City Council) are warranted in respect to guiding the future development of strategic sites and infill development.

Appropriate locations for future medium density housing within existing suburbs have not been divulged and need to be reviewed. From a Council perspective the issues of positioning and governance are critical. Identification of strategic locations for urban infill will also guide Council’s provision of future infrastructure.

There are other strategic land uses the Northern Territory Government will need to consider for population growth including, the need for a future regional waste facility to accommodate additional waste and the need for a hazardous waste facility to service the expected oil and gas industry based in Darwin.

Governance

A clear structure of roles, responsibilities, communication and coordination between the Northern Territory Government and the three Councils controlling the subject areas covered by the Land Use Plan, will be required to support implementation of the Plan. The Land Use Plan should provide clarity in regard to the expected roles of the respective Councils, how the Northern Territory Government will support these roles and what measures will be put in place to monitor and coordinate joint delivery actions.

Without a clear governance framework, it will be difficult to coordinate joint implementation, share resources and develop a common understanding on the key issues and responses. Once again, the section in the Land Use Plan on “partnering with local government” is inadequate in this regard, providing little insight into exactly how the Northern Territory Government proposes to work with Council to achieve the working relationship to which it aspires.

The Australian Government will likely consider compatibility with the criteria when making infrastructure funding decisions. The Darwin City Council should urge the Northern Territory Government to ensure that the Land Use Plan satisfies the COAG criteria.

Implementation

Darwin City Council considers that accountability will be paramount in delivering this or similar plans. As such, Darwin City Council recommends that a publically available delivery plan be established and regularly reported on which specifies responsibility for specific actions, KPI’s and Budget commitments.

TOPROC

The Greater Darwin Region Land Use Plan was discussed at the TOPROC meeting on 11 April 2011 and a draft letter outlining the key issues will be prepared on TOPROC’s behalf and forwarded to the NT Government for comment on the Plan.
FINANCIAL IMPLICATIONS:

Nil.

STRATEGIC PLAN IMPLICATIONS:

The issues addressed in this Report are in accordance with the following Goals/Strategies of the Darwin City Council 2008 – 2012 as outlined in the ‘Evolving Darwin Strategic Directions: Towards 2020 and Beyond’:-

Goal 1:
1. Achieve Effective Partnerships and Engage in Collaborative Relationships.

Outcome
1.1 Improve relations with all levels of Government.

Key Strategies
1.1.4 Play a strategic role in the planning and developmental processes that impact Darwin.
1.1.5 Influence Government and developers to develop sustainable projects which reflect Darwin’s lifestyle.
1.2 Effectively engage with Community.
1.2.1 Increase involvement of the Business Community for developing solutions to local issues.

Goal 2:
2. Enhance Darwin’s Active, Positive and Flexible Lifestyle.

Outcome
2.1 Improve urban enhancement around Darwin.

Key Strategies
2.1.1 Manage and maintain the municipal landscaping and infrastructure to a standard that meets community needs.
2.1.4 Provide a clean and liveable municipality.

Goal 3:
3. Assist Individuals and the Community Stay Connected with the Darwin Region.

Outcome
3.1 Promote the use of public spaces.

Key Strategies
3.1.1 Enhance public spaces and encourage greater use by the community.
3.2 Enhance transport.
3.2.1 Review transport and parking needs systems.
3.2.4 Provide parking facilities and management systems which meet the needs of the community.
Goal 4:
4. Create and Maintain an Environmentally Sustainable City.

Outcome
4.2 Improve water conservation.

Key Strategies
4.2.2 Manage and maintain Council’s storm water management system.

LEGAL IMPLICATIONS:

This item is not considered "Confidential".

PUBLIC RELATIONS IMPLICATIONS:

Not Assessed.

COMMUNITY SAFETY IMPLICATIONS:

Not Assessed.

DELEGATION:

Not Required.

CONSULTATION:

Due to the high rate of anticipated infill development predicted in the Greater Darwin Land Use Plan, Council decided to hold a Community Forum to discuss the issue of infill. The forum was held on 11 April 2011 at Council’s Civic Centre. Eighty-five (85) people attended the meeting.

The guest speaker, Professor Richard Weller, provided insights into the key principles for sustainable development (including infill) in modern cities.

Some of the key points raised by the public who attended are as follows:

- Need for more detailed master plans to guide new development areas and infill redevelopment.
- Consideration needed for aging members of the community. (eg. Universal design principles, ‘granny flats’).
- Need to maintain unique Darwin lifestyle and sense of place.
- Need for sound urban design and planning principles to be considered in planning for new suburbs and intensification of existing areas.

PROPOSED PUBLIC CONSULTATION PROCESS:

Northern Territory Government is undertaking public consultation of its draft document.
APPROPRIATE SIGNAGE:

Not Applicable.

RECOMMENDATIONS:

A. THAT Report Number 11TS0077 CR:fh entitled Discussion On The Greater Darwin Region Land Use Plan - Towards 2030 - Consultation Paper, be received and noted.

B. THAT Council endorse Attachment B to Report Number 11TS0077 CR:fh entitled Discussion On The Greater Darwin Region Land Use Plan - Towards 2030 - Consultation Paper, as its formal submission and that the Lord Mayor forward a copy, to the Minister for Lands and Planning.

GENERAL MANAGER INFRASTRUCTURE

Any queries on this report can be directed to Cindy Robson on 8930 0528 or email c.robson@darwin.nt.gov.au
Capital city strategic planning systems should:

1. be integrated:
   a) across functions, including land-use and transport planning, economic and infrastructure development, environmental assessment and urban development, and
   b) across government agencies;
2. provide for a consistent hierarchy of future oriented and publicly available plans, including:
   c) long term (for example, 15-30 year) integrated strategic plans,
   d) medium term (for example, 5-15 year) prioritised infrastructure and land-use plans, and
   e) near term prioritised infrastructure project pipeline backed by appropriately detailed project plans;
3. provide for nationally-significant economic infrastructure (both new and upgrade of existing) including:
   f) transport corridors,
   g) international gateways,
   h) intermodal connections,
   i) major communications and utilities infrastructure, and
   j) reservation of appropriate lands to support future expansion;
4. address nationally-significant policy issues including:
   k) population growth and demographic change,
   l) productivity and global competitiveness,
   m) climate change mitigation and adaptation,
   n) efficient development and use of existing and new infrastructure and other public assets,
   o) connectivity of people to jobs and businesses to markets,
   p) development of major urban corridors,
   q) social inclusion,
   r) health, liveability, and community wellbeing,
   s) housing affordability, and
   t) matters of national environmental significance;
5. consider and strengthen the networks between capital cities and major regional centres, and other important domestic and international connections;
6. provide for planned, sequenced and evidence-based land release and an appropriate balance of infill and greenfields development;
7. clearly identify priorities for investment and policy effort by governments, and provide an effective framework for private sector investment and innovation;
8. encourage world-class urban design and architecture; and
9. provide effective implementation arrangements and supporting mechanisms, including:
   u) clear accountabilities, timelines and appropriate performance measures,
   v) coordination between all three levels of government, with opportunities for Commonwealth and Local Government input, and linked, streamlined and efficient approval processes including under the Commonwealth Environment Protection and Biodiversity Conservation Act 1999,
   w) evaluation and review cycles that support the need for balance between flexibility and certainty, including trigger points that identify the need for change in policy settings, and
   x) appropriate consultation and engagement with external stakeholders, experts and the wider community.

Department of Lands and Planning
GPO Box 1680
DARWIN NT 0801

Dear Mark

Greater Darwin Region Land Use Plan: Towards 2030 Consultation Paper

Darwin City Council supports the development of a Strategic Land Use Plan for the Greater Darwin Region and offers the following comments in relation to the abovementioned Consultation Paper prepared by the Northern Territory Government.

The Greater Darwin Region Land Use Plan ('the Land Use Plan') indicates strong population growth for the Darwin Region over the next 14 years, with up to 41.5% of all new dwellings over that period occurring within the Darwin City Council Municipal boundary.

In accommodating the bulk of new dwelling growth, it will be important for Darwin City Council to strategically focus physical and social infrastructure upgrades efficiently. In this regard, careful consideration of the most suitable areas for infill beyond any identifiable major infill sites should be made.

Appropriate locations for future medium density housing within existing suburbs have not been divulged and need to be reviewed. From a Council perspective identification of strategic locations for urban infill to guide Council’s provision of physical and social infrastructure is critical.

Darwin as a Capital City is the population and economic hub of the Northern Territory. Major cities drive the Australian economy generating 80 percent of our GDP and housing nearly 75 per cent of Australia’s workforce. Priority road and rail linkages, airports and ports are required to support Darwin’s productivity.

The capacity for Darwin to manage change and accommodate growth will determine the quality of life and economic prosperity of all Territorians. Coordination and planning across all levels of government must drive better integrated land use, settlement, and infrastructure and climate adaption. The Land Use Plan should seek to stimulate Darwin’s population growth to attract and retain a skilled workforce.

..../2
In doing so we must ensure Darwin remains an attractive and affordable place to live. The provision of sustainable physical and social infrastructure needs to be a priority as part of any Land Use Plan.

Darwin City Council recognises the need for all three levels of government to work together, and with the community to ensure our municipality and the surrounding areas are managed sustainably for the future and well being of the community.

Local government provides the most accessible level of government and holds unique knowledge about local community needs and is responsible for community assets worth billions of dollars.

Darwin City Council’s key concerns regarding the Greater Darwin Region Land Use Plan Towards 2030 Consultation Paper, are summarised as follows:

- the process and inadequacy of early genuine engagement and consultation with local government;
- the lack of detail within the Plan relating to the underpinning plans, strategies and policies described in the Plan which are considered essential in order to deliver on the outcomes (eg. Transport and Infrastructure Strategies);
- the lack of evidence to support predicted population growth and sustainability;
- uncertainty of funding and timing of key infrastructure to support the population growth; and
- the lack of detail within the Plan surrounding the further development and importance of Darwin as the Capital City and the broader region as the economic and business centre of the Territory.

Darwin City Council submits that the Territory and local Governments must ideally align themselves to ensure that the desired outcomes of the Land Use Plan are delivered.

Darwin City Council seeks access to the research that underpins the Land Use Plan to better understand and provide a fully informed response to the Plan in areas such as but not limited to the following:

- demographic projections;
- Economic, Employment, Infrastructure, Transport, Social & Cultural, Environment plans relevant to the Darwin Region that have been used to develop and/or support the Land Use Plan;
- Climate change, rising sea level and updated storm surge plans;
- infill modelling;
Partnering with Local Government

The section on Partnering with local government (p66) is brief and appears to underestimate the significant role that Councils will play in managing growth and providing key forms of infrastructure and services.

Darwin City Council considers that there has not been an early genuine engagement and consultation with local government in the development of the Plan.

Rather than having a limited opportunity to critique the document prepared by the Northern Territory Government, Darwin City Council is of the view that local government should be included as a stakeholder in the formation of this and similar documents.

In reflecting on the Council of Australia Governments (COAG) criteria contained in Attachment A we note that Criteria 9 identifies the request for co-ordination with local government (as one of the three levels of government).

Without close coordination with and the support from Councils, many of the Land Use Plan’s key goals will be much harder to achieve. For example, without a supportive Council service delivery framework the Land Use Plan’s desired network of multi-purpose activity hubs may be little more than shopping centres.

Another example could be the need to improve Council stormwater drainage and road infrastructure in order to maximise infill yields in key precincts. To achieve this Council will need to work with other service authorities and the Northern Territory Government to develop contribution plans for future upgrades.

The opportunity exists for Council and the Northern Territory Government to work positively together in meeting the goals of the Land Use Plan. To achieve this a clear structure of roles, responsibilities, communication and coordination between the Northern Territory Government and the affected Councils will be required to support implementation of the Land Use Plan. The Plan should be clear about the expected roles of Council, how the Northern Territory Government will support these roles, and what measures will be set in place to monitor and coordinate joint delivery actions.

Without a clear governance framework, it will be difficult to coordinate joint implementation, share resources and develop a common understanding on the key issues and responses.
Sustainability

Sustainability is stated as a core focus of the Land Use Plan, however there is limited detail as to how the Land Use Plan actually promotes sustainability beyond advocating for a more compact city through infill development and development along key transport routes. To achieve its sustainability goals, the Land Use Plan is reliant upon integration with numerous other strategies, such as those associated with Transport and Infrastructure which have not been developed yet.

Without consideration of how the Land Use Plan will integrate with key functions such as transport, it is difficult to fully understand the implications of the Land Use Plan. Council believes that an integrated Metropolitan Strategic Plan is required to ensure that the Darwin region is globally competitive, productive, sustainable, liveable and socially inclusive and is well placed to meet future growth.

Growth

Identifying a specific additional dwelling target is supported, as is the intent to accommodate infill development to assist in achieving the targets. However, it is important to recognise that infill development does not occur automatically and that yields from infill development can be difficult to achieve. To this end, targets actually need to be set above the theoretical capacity. Much depends on market choice and preference, community resistance, together with affordability considerations.

There is a clear intent to consolidate existing urban growth, the means of achieving such are limited to targeted infill and redevelopment opportunities. A further approach may be to encourage higher density developments at the fringe, within master planned communities, which will also slow the rate of urban expansion.

Much of the new (Greenfield) growth nominated in the Land Use Plan is focussed in the proposed City of Weddell. This is a relatively remote location, the success of which is highly dependent upon the provision of employment, human services and integrated transport solutions, none of which are detailed in the Land Use Plan.

The application of low, medium and high growth scenarios, as shown on the Land Use Framework Plan is unclear. One interpretation is, for example, that Weddell only occurs under a high growth scenario. It is also unclear if the Land Use Plan makes any allowance for the uncertainty in land supply. The evidence in some other capital cities is that approximately 30% of land within identified growth areas never gets zoned. Furthermore, land earmarked for residential growth can also be taken up by schools and other infrastructure reducing anticipated yields. Allowances are needed to avoid under supply and upward pressure on prices.
Housing

It is noted that the dwelling targets include the period 2006-2010. For Darwin City the target for this period is 1,020 dwellings, yet the Land Use Plan suggests that approximately 2,000 dwellings were approved in this period. It appears that the CBD is already ahead of target. Adjustments to the dwelling targets/capacities should ideally be made ahead of formal adoption of the Land Use Plan.

The recognition of the need to expand housing choices is supported, with greater focus required on temporary accommodation, retirement living and affordable housing. Design guidance is required outside of the Land Use Plan to facilitate appropriate development outcomes, including the incorporation of universal design principles across the housing spectrum to allow for greater housing flexibility.

The Land Use Plan allocates 15% of all new residential land for affordable and social housing needs. A suitable housing strategy or guidelines will be required to ensure that substandard housing is avoided and adequate social infrastructure is provided to support lower income households. The Land Use Plan also notes the creation of an Affordable Housing Company to develop and manage affordable housing in the Darwin Region. Darwin City Council supports this initiative.

Transport and Infrastructure

Identifying key infrastructure as part of the Land Use Plan is supported (eg. rapid transit corridor). However, it is important that timing and funding arrangements be determined to ensure implementation occurs ahead of, or as part of key future developments (i.e. Weddell) to support the focus on sustainability and reduce the likelihood of households establishing car dependency.

Strategic Direction 06, states that a series of strategies will be developed to improve integration of land use planning, transport and infrastructure planning. This is important to support future growth in a sustainable manner and the development of these strategies in line with the Land Use Plan is considered critical.

Retail and Commercial

The creation of a hierarchy of future activity centre nodes is supported providing they are of a scale and form which acts as more than just a retail hub for the surrounding communities. Further detailed policies/-actions are required to guide suitable development.

Planning for retail development and activity centres is also critical to supporting sustainable and walkable communities. To this end, the identification of future neighbourhood centres is supported.
Employment and Industry

Ensuring the identification and provision of zoned and serviced land for industrial development and growth is essential to underpin the overall growth of Darwin and reinforce the Darwin Region position as the economic and major business centre for the Territory. The Land Use Plan identifies future strategic land. However, it is important that a rolling supply of zoned and serviced land be maintained.

The Land Use Plan makes specific reference to industrial land use. An alternate approach may be to broaden this to include ‘employment lands’, where major economic and job creation activity can occur, in addition to more traditional industrial uses.

Darwin Municipality Specific Comments

The Land Use Plan appropriately reinforces the primacy of Darwin as the Region’s administration, tourism and retail centre.

However Darwin should also be recognised for its central role in accommodating housing and population as well as being the cultural and recreational hub of the Territory. This is particularly relevant, given that the Darwin Municipality is earmarked to accommodate 40 percent of future residential growth in the region.

To succeed, urban infill requires a strong focus on place making/urban design to make places attractive and amenable and to assist in encouraging development. Developments need to include adequate setbacks and permeable vegetated open spaces in order to avoid the creation of heat islands that increase the temperature of our liveable space. Darwin City Council, along with other agencies, will play a key role in respect to facilitating such outcomes.

Identifying suitable areas for future urban infill and the level of development appropriate, should include consideration of factors such as:

Accessibility to services and public infrastructure:

- Public Transport
- Schools
- Recreation (social gathering places, active spaces, local parks)
- Medical Facilities
- Shops
- Employment
- Road networks
- Essential infrastructure capacity for sewer, water, power, stormwater
Urban form:

- Streetscape
- Suburb layout
- Scale of development
- Useable open space
- Mix of housing options
- Climate Change

Darwin City Council considers that significant body of work is required in order to fully understand the affects, both positive and negative, and community support relating to various infill models in order to allow informed community discussion and debate.

Darwin – Inner Suburbs are targeted for growth via infill/densification (ie dual occupancy on 1200sqm allotments). Such a strategy has the potential to change the established character of suburbs and to succeed, it needs to be supported by design guidelines which demonstrate best practise in urban infill. If early redevelopment examples are poor then there is potential for the community to resist further infill. Design and amenity will be the key, with amendments to the NT Planning Scheme critical to avoiding unacceptable impacts on surrounding properties.

Darwin – Northern Suburbs is targeted as a growth area, particularly adjacent to the Casuarina Shopping Centre. The encouragement of high densities adjacent to activity centres is important. However, it is equally as important to recognise that activity centres should provide more than just a retail experience. Structure planning and policy planning needs to occur which facilitates development/redevelopment whereby centres become a community destination and focus for recreation and entertainment with spaces designed to attract visitation. Centres should be designed to address and integrate with the surrounding community to promote visitation over a longer period (i.e. throughout the day and evening) and be designed with Crime Prevention Through Environmental Design (CPTED) principles in mind.

More than 40 percent of the additional new dwellings in the region are expected to be accommodated in the Darwin Municipality, within either the CBD, the development of strategic sites or infill. Whilst not the role of the Land Use Plan, detailed policies (developed in conjunction with Darwin City Council) are warranted in respect to guiding the future development of strategic sites and infill development, within Darwin City Council boundaries.

There are also other strategic land uses the Northern Territory Government will need to consider in relation to population growth including the need for a future regional waste facility to accommodate additional waste and the need for a hazardous waste facility to service the expected oil and gas industry based out of Darwin.
Darwin City Council also encourages the Northern Territory Government to revisit the Council of Australia Governments (COAG) objectives and criteria for future strategic planning of capital cities, particularly the criteria relating to integration of functions and integration of government agencies. The Commonwealth will be considering compatibility with the criteria when making infrastructure funding decisions. Therefore Darwin City Council urges the Northern Territory Government to ensure that the Land Use Plan satisfies the COAG criteria.

**Implementation**

Darwin City Council considers that accountability will be paramount in delivering this or similar plans. As such, Darwin City Council recommends that a publically available delivery plan be established and regularly reported on which specifies responsibility for specific actions, KPI’s and Budget commitments.

If you require any further discussion in relation to this matter please feel free to contact me on 8930 0505.

Yours faithfully

**BRENDAN DOWD**

**CHIEF EXECUTIVE OFFICER**

Encl
COAG Criteria For Capital City Strategic Planning Systems

Capital city strategic planning systems should:

1. be integrated:
   a) across functions, including land-use and transport planning, economic and infrastructure development, environmental assessment and urban development, and
   b) across government agencies;

2. provide for a consistent hierarchy of future oriented and publicly available plans, including:
   c) long term (for example, 15-30 year) integrated strategic plans,
   d) medium term (for example, 5-15 year) prioritised infrastructure and land-use plans, and
   e) near term prioritised infrastructure project pipeline backed by appropriately detailed project plans;

3. provide for nationally-significant economic infrastructure (both new and upgrade of existing) including:
   f) transport corridors,
   g) international gateways,
   h) intermodal connections,
   i) major communications and utilities infrastructure, and
   j) reservation of appropriate lands to support future expansion;

4. address nationally-significant policy issues including:
   k) population growth and demographic change,
   l) productivity and global competitiveness,
   m) climate change mitigation and adaptation,
   n) efficient development and use of existing and new infrastructure and other public assets,
   o) connectivity of people to jobs and businesses to markets,
   p) development of major urban corridors,
   q) social inclusion,
   r) health, liveability, and community wellbeing,
   s) housing affordability, and
   t) matters of national environmental significance;

5. consider and strengthen the networks between capital cities and major regional centres, and other important domestic and international connections;

6. provide for planned, sequenced and evidence-based land release and an appropriate balance of infill and greenfields development;

7. clearly identify priorities for investment and policy effort by governments, and provide an effective framework for private sector investment and innovation;

8. encourage world-class urban design and architecture; and

9. provide effective implementation arrangements and supporting mechanisms, including:
   u) clear accountabilities, timelines and appropriate performance measures,
   v) coordination between all three levels of government, with opportunities for Commonwealth and Local Government input, and linked, streamlined and efficient approval processes including under the Commonwealth Environment Protection and Biodiversity Conservation Act 1999,
   w) evaluation and review cycles that support the need for balance between flexibility and certainty, including trigger points that identify the need for change in policy settings, and
   x) appropriate consultation and engagement with external stakeholders, experts and the wider community.
14 INFORMATION ITEMS AND CORRESPONDENCE RECEIVED

14.1 Nomination to the Northern Territory Grants Commission
Document No. 2001225  (04/05/11)  Common No. 2001225

A. THAT the incoming Request for Nomination to the Northern Territory Grants Commission - Local Government Association of the Northern Territory (LGANT), be received and noted.

B. THAT Council endorse Alderman .......... as its Nomination to Northern Territory Grants Commission.

DECISION NO.20\() (17/05/11)
NT GRANTS COMMISSION

Overview

The Northern Territory Grants Commission is established as an independent statutory authority under the **Local Government Grants Commission Act 1986**. Its primary role is to allocate financial assistance grants provided by the Australian Government to Northern Territory local governing bodies in the form of general purpose grants and local roads grants.

It is a requirement under the Commonwealth’s **Local Government (Financial Assistance) Act 1995** that there is a local government grants commission in each State and the Northern Territory to make recommendations on the allocation of funding to local governments made under the Act.

Functions

The Commission makes recommendations to the Federal Minister in respect of the amounts of money to be allocated to local governing bodies from the money provided to the Territory by the Commonwealth under the **Local Government (Financial Assistance) Act 1995**.

The Commission also makes recommendations on such other matters relating to the finances of local governing bodies as the Northern Territory Minister for Local Government, from time to time, refers to the Commission.

The **Local Government Grants Commission Act 1986** provides for a Commission of four members, consisting of:

- a Chairman appointed by the Minister;
- the Chief Executive Officer (CEO) of the Agency primarily responsible to the Minister for the administration of the Act, or his delegate; and
- two members appointed by the Minister; one representing the interests of municipal councils and the other representing the interests of community government councils and approved local governing bodies.

The current members of the Commission are:

- Chairman - Bob Beadman
- CEO's Delegate - Trish Angus
- Representing Municipal Councils - Damien Ryan
- Representing Community Government Councils – Steven Hennessey
- Deputy Representing Municipal Councils – Lissa Herrmann
- Deputy Representing CGC councils - Margaret Vigants

Administration and Staffing

The Executive Officer, Mr Peter Thornton, and Mrs Donna Hadfield, both of the [Department of Housing, Local Government and Regional Services](#), coordinate the visitation programs and assist with the Commission’s activities by providing executive support to the Commission.

MEETINGS

Meetings are held as required and generally 2-3 times per year. Members will be required to attend visitations of all local governments, which is on a 3-year rotation. These visits will include all communities within shires with some visitations lasting up to one week.
LGANT representatives on committees are required to provide the Association with regular reports and an annual report for its Annual General Meeting in November of each year.

The Association also requires the minutes of each meeting attended to be emailed to the CEO's Personal Assistant, cassie.cook@lgant.asn.au.

Representatives are required to supply the Association with contact details such as mobile phone number, email address, postal address and the council they are a member of.

The Association will supply information to nominees of committees, including their Terms of Reference.

If a LGANT representative resigns from a committee, he/she is requested to inform the Association in writing, by letter or email, so that an alternative representative can be nominated to the committee.

The Association may remove its endorsement of a representative on a committee if that representative fails to deliver regular reports or misses meetings without just cause. It would then be up to the committee to decide whether or not the representative remains on that committee if the representative is without LGANT endorsement.
LOCAL GOVERNMENT ASSOCIATION OF THE NORTHERN TERRITORY

NOMINATION FORM FOR
