

**APPLICATION FORM FOR SOIL DISPOSAL
2023-2024**

Soil will only be accepted at the Shoal Bay Waste Management Facility if the material has been approved in writing by the Councils Waste Services Team.

Please allow five business days for approval.

Please email completed applications to: waste@darwin.nt.gov.au

SECTION 1: WASTE GENERATOR AND DECLARATION

Generator of waste: _____

Contact name: _____ Email: _____

Tel: _____ Mobile: _____

Address of waste source: _____

Activity Generating Waste: _____
Eg. Site clean-up, spill, footings, etc.

Type of Waste: _____

Estimated Quantity: _____ tonnes

Declaration: This load consignment does not contain materials as listed in Schedule 2 of The Waste Management and Pollution Control (Administration) Regulations (attached) unless approved by Council.

TRUE FALSE

I have supplied MSDS to Council YES NO

I have supplied laboratory results to Council YES NO

I have supplied laboratory results of virgin material to Council YES NO

Signature of Generator: _____ Date: _____

TRANSPORT DECLARATION

Company Name: _____

Mobile: _____ Email: _____

Vehicle Registration: _____ Environmental Protection Licence: _____

Driver's Name: _____ Signature: _____

Date: _____

Privacy Statement

The information requested in this form is being collected by the City of Darwin for the purpose of updating our administrative and financial systems to be able to carry out the City of Darwin's functions. If you do not provide the information the City of Darwin may not be able to update your details or process your application. The City of Darwin may disclose the information provided by you on this form to a third party, as required or authorised by the City of Darwin By-Laws of the Local Government Act or in accordance with the Information Act or our Privacy Policy which is available on our website www.darwin.nt.gov.au or on request from Council's office. You may obtain access to your personal information held by Council by submitting a request for information form that is available on our website or from the "Information Officer" (08) 8930 0300.

CITY OF DARWIN DISPOSAL AUTHORISATION – OFFICE USE ONLY

CLEAN FILL CRITERIA

Please note that material assessed as clean fill will be inspected by on site staff to ensure the material is suitable to be used for cover. Clean fill must not contain 10% or more of vegetation or rock/rubble larger than 200mm. Non-compliant loads will be charged at the applicable commercial rate.

Assessed waste type:

- Clean Fill Free
- Soil - contaminated Per Tonne: \$150.00

Disposal Instructions: _____

Approved Authorisation Number: _____

Not Approved: Reason: _____

Authorised Signatory: _____ Date: _____

Schedule 2 – Waste Management and Pollution Control (Administration) Regulations 1998

<ul style="list-style-type: none"> • Acidic solutions or acids in solid form • Animal effluent and residues (abattoir effluent, poultry and fish processing waste) • Antimony, antimony compounds • Arsenic, arsenic compounds • Asbestos • Barium compounds other than barium sulphate • Basic solutions or bases in solid form • Beryllium, beryllium compounds • Boron compounds • Cadmium, cadmium compounds • Ceramic-based fibres with physico-chemical characteristics similar to those of asbestos • Chlorates • Chromium compounds that are hexavalent or trivalent • Clinical and related wastes • Cobalt compounds • Containers that are contaminated with residues of a listed waste • Copper compounds • Cyanides (inorganic) • Cyanides (organic) • Encapsulated, chemically fixed, solidified, or polymerised wastes • Ethers • Filter cake • Fire debris and fire wash waters • Fly ash • Grease trap waste • Halogenated organic solvents • Highly odorous organic chemicals (including mercaptans and acrylates) • Inorganic fluorine compounds excluding calcium fluoride • Inorganic sulphides • Isocyanate compounds • Lead, lead compounds • Mercury, mercury compounds • Metal carbonyls • Nickel compounds • Non-toxic salts • Organic phosphorus compounds • Organic solvents excluding halogenated solvents • Organohalogen compounds that are not otherwise specified in this Schedule • Perchlorates 	<ul style="list-style-type: none"> • Phenols, phenol compounds including chlorophenols • Phosphorus compounds other than mineral phosphates • Polychlorinated dibenzo-furan (any congener) • Polychlorinated dibenzo-p-dioxin (any congener) • Residue from industrial waste treatment or disposal operations • Selenium, selenium compounds • Sewage sludge and residues including nightsoil and septic tank sludge • Soils contaminated with a listed waste • Surface active agents (surfactants) that contain principally organic constituents and that may contain metals and inorganic materials • Tannery wastes (including leather dust, ash, sludges and flours) • Tellurium, tellurium compounds • Thallium, thallium compounds • Triethylamine catalysts for setting foundry sands • Tyres • Vanadium compounds • Waste chemical substances arising from research and development or teaching activities, including those substances which are not identified and/or are new and the effects of which on human health and/or the environment are not known • Wastes containing peroxides other than hydrogen peroxide • Waste, containing cyanides, from heat treatment and tempering operations • Waste from the manufacture, formulation and use of wood-preserving chemicals • Waste from the production, formulation and use of biocides and phytopharmaceuticals • Waste from the production, formulation and use of inks, dyes, pigments, paints, lacquers and varnish • Waste from the production, formulation and use of organic solvents • Waste from the production, formulation and use of photographic chemicals and processing materials • Waste from the production, formulation and use of resins, latex, plasticisers, glues, and adhesives • Waste from the production and preparation of pharmaceutical products • Waste mineral oils unfit for their original intended use • Waste mixtures, or waste emulsions, of oil and water or hydrocarbon and water • Waste pharmaceuticals, waste drugs and waste medicines • Waste resulting from surface treatment of metals and plastics
---	---

<ul style="list-style-type: none">• Waste tarry residues arising from refining, distillation, and any pyrolytic treatment• Waste Substances and articles containing or contaminated with polychlorinated biphenyls (PCBs), polychlorinated naphthalene's (PCNs) polychlorinated terphenyls (PCTs) and/or polybrominated biphenyls (PBBs)• Waste of an explosive nature not subject to the Dangerous Goods Act 1998 or the Work Health and Safety (National Uniform Legislation) Act 2011• Wool scouring waste• Zinc compounds
