

REQUEST FOR STREET TREE

Trees help to support natural ecosystems in an urban environment. City of Darwin promotes a sustainable and unique tropical lifestyle, and street trees are one of the important ways we can help to achieve this goal.

Street tree plantings are scheduled to commence within December to April, when weather conditions are suitable. This gives the tree/s the best possible chance to establish, a number of constraints may inhibit the opportunity for trees to be planted on nature strips including underground services, surrounding infrastructure and sight lines for pedestrians and vehicles.

Use this form to request a street tree for planting in your area. Requests must be made **no later than 30 September each year** for planting to be considered.

Name: _____

Address: _____

Home Phone: _____

Mobile Phone: _____

Number of Trees Requested (please only tick one box):

One (1)

Two (2)

Tree Type Requested*: _____

**Council will consider and discuss the proposal; however in some cases certain tree species may not be appropriate due to varying factors. These factors will be explained by Council's Technical Officer.*

If your request is approved the tree will remain the property of City of Darwin. Council has specialised Arboricultural/Horticultural staff to conduct tree maintenance activities. Please contact City of Darwin in the first instance where any work on trees may need to be carried out.
